JUNE 30, 1999

Forts in Florida

About the cover: This year's theme for the Florida Comprehensive Annual Report highlights several forts around Florida. Many of these forts played a vital role in the security of Florida and the United States. In the aftermath of the War of 1812, a set of forts stretching from Maine to Texas was envisioned to provide defense for the young country. Several forts highlighted in this report were the result of this vision. As weapons technology improved, old forts were modified and new forts were built. This process continued until missiles, airplanes, and atomic bombs rendered the concept of coastal defense obsolete. However, for over a century, seacoast forts served to discourage attacks on this country. Today, they serve as links to the world that existed prior to World War II. Most of the forts highlighted in this report are designated as state parks, national parks, or national monuments and are open to the public. The fort highlighted on the cover is the Castillo de San Marcos in St. Augustine, one of the oldest and most unique forts in the United States. The back cover of this report highlights Fort Pickens, the largest of four forts built to defend Pensacola Bay. Below is a map of the State of Florida, highlighted with the forts discussed in this report.

- ❖ Special appreciation is given to all fiscal and accounting personnel throughout the State whose extra efforts to contribute financial data for their agencies made this report possible.
- ❖ Graphics design by Kimberly Gillmore, a student at Tallahassee Community College, Tallahassee, Florida, under the direction of Mr. Rick Rice of the TCC Graphic Design Technology Program.
- ❖ Special thanks to Visit Florida for the use of their beautiful pictures of the Castillo de San Marcos, Fort Pickens, Fort Zachary Taylor, and Fort Caroline. Thanks also to the National Park Service and the Florida Department of Environmental Protection for pictures of the Dry Tortugas National Park, the Castillo de San Marcos, Fort Caroline, Fort Clinch, and Fort Zachary Taylor used in this publication.

This report highlights several important forts around the State of Florida. Many of these forts played a vital role in the security and history of Florida and the United States. These forts have interesting designs and construction, including Fort Jefferson in the Dry Tortugas, one of the largest forts in the United States, and the Castillo de San Marcos in St. Augustine, the oldest masonry fort in the continental United States.

STATE OF FLORIDA COMPTROLLER'S OFFICE

THE COMPTROLLER...HAS BEEN THOUGHT OF FIRST OF ALL AS THE "WATCHDOG OF THE PUBLIC TREASURY." THIS ROLE IS EMPHASIZED IN THE OFFICIAL SEAL OF THE OFFICE. IT SHOWS A LARGE SAFE GUARDED BY A DOG WITH THE WORD DEFENDO BENEATH. DEFENDO MEANS "I DEFEND."

*The Florida Handbook, 21st Edition,
1987-1988 by Allen Morris*

VISION

Defines our goals for the future.

- ◆ Accountability to the people of Florida is our highest priority.
- ◆ We will ensure that the State is fiscally sound and is accountable to the public through the Florida Accounting Information Resource (FLAIR) programs.
- ◆ We will deploy the use of state-of-the art information technology to accomplish our responsibilities.
- ◆ We will continuously provide the citizens of Florida with timely, factual and comprehensive information on the financial status of the State.

MISSION

States why we exist as a department and what we want to achieve for the citizens of the State of Florida.

- ◆ The Office of Comptroller/ Department of Banking and Finance serves as the "Watchdog" of public funds.
- ◆ Defends and protects the financial interests of Florida citizens through the conduct of our constitutional and regulatory responsibilities.
- ◆ Supports those financial industries that the Department oversees.

STRATEGIC ISSUES

- ◆ Accountability for funds entrusted to Florida State government.
- ◆ Concern for consumers and protection of their financial interests.
- ◆ Regulation of the financial services industry and concern for the economic prosperity, integrity, and reputation of the industry.

STATE OF FLORIDA

INTRODUCTORY SECTION

OFFICE OF COMPTROLLER
DEPARTMENT OF BANKING AND FINANCE
STATE OF FLORIDA
TALLAHASSEE
32399-0350

ROBERT F. MILLIGAN
COMPTROLLER OF FLORIDA

February 4, 2000

The Honorable Jeb Bush
Governor of the State of Florida
The Capitol
Tallahassee, Florida

Dear Governor Bush:

It is my pleasure to submit to you the Comprehensive Annual Financial Report of the State of Florida for the year ended June 30, 1999. This report has been prepared in conformance with generally accepted accounting principles as prescribed in pronouncements of the Governmental Accounting Standards Board (GASB). It is a comprehensive presentation of the State's financial and operating activities during the past fiscal year. The accuracy and completeness of the presentation are the responsibility of the State.

The Reporting Entity

The reporting entity consists of the State Legislative agencies, departments, boards and commissions of the Executive branch, offices relating to the Judicial branch, and component units of the State. Criteria for defining the reporting entity, identified and described in the GASB's Codification of Governmental Accounting and Financial Reporting Standards, Sections 2100 and 2600, were used. These criteria are used to evaluate potential component units for which the State is financially accountable, and other organizations for which the nature and significance of their relationship with the State are such that exclusion would cause the State's financial statements to be misleading or incomplete. The reporting entity is further described in Note 1 to the financial statements.

Financial Statement Presentation

This report is presented in three sections: the introduction, the financial section and the statistical and economic data. The introductory section contains this transmittal letter, an organizational chart, a listing of principal State officials and graphs of governmental funds' revenues and expenditures. The financial section includes the auditor's report, the general purpose financial statements, notes to the financial statements, required supplementary information, and the combining statements for all funds and account groups. The statistical and economic data section includes various schedules and information regarding the finances and demographics of the State.

Because of the large number of funds used by the State agencies and departments, each fund could not be displayed in the combining statements and maintain a meaningful presentation. Therefore, funds were combined by department, i.e. function, and the most significant are described individually.

Accounting System and Budgetary Control

Section 215.93, Florida Statutes, amended by the Laws of Florida, Chapter 97-286, established the Florida Financial Management Information System (FFMIS). The FFMIS Act requires the design and implementation of a unified management information system, which contains five subsystems. One of the five subsystems designated by the Legislature is the Florida Accounting Information Resource (FLAIR) Subsystem. My office is responsible for the design, implementation and operation of FLAIR.

FLAIR is a computer-based, double entry general ledger accounting system. It provides the capability to account for governmental operations on the modified accrual basis and to account for Proprietary, Nonexpendable Trust, Pension, Investment Trust, and State University System funds' operations on the accrual basis. Internal

accounting controls are in place to provide reasonable assurance regarding the safeguarding of assets and reliability of financial records for the preparation of financial statements and maintaining accountability.

While the departmental component of FLAIR provides agency management with a budgetary check mechanism, the comptroller's central accounting component (also part of FLAIR) maintains a separate accounting system on the cash basis for the control of budget by line item of the appropriations act. Overspending is strictly prohibited by Florida law.

Florida certifies forward liabilities and encumbrances at June 30 and has a six-month period to liquidate these obligations. Unexpended certified forward budget reverts on December 31. Goods or services for all fund types received on or before June 30 are recorded as liabilities and expenditures or expenses, whichever is appropriate. For governmental type funds, certified forward disbursements for goods or services encumbered as of June 30 are appropriately reported as a reserve of fund balance at June 30, and not as liabilities or expenditures.

General Governmental Functions

Governmental funds include general, special revenue, capital projects and debt service funds. These funds are presented on the modified accrual basis of accounting. Revenues are recognized when they are both measurable and available to finance current expenditures. The amounts of governmental fund revenues from various sources for the fiscal years 1998 and 1999 are shown below (in thousands):

Revenue Sources	Amount		Amount of Change	Percent of Total	
	1998	1999		1998	1999
Taxes	\$ 21,895,836	\$ 23,023,672	\$ 1,127,836	61	62
Licenses and permits	908,028	892,812	(15,216)	3	2
Fees and charges	2,582,493	2,278,355	(304,138)	7	6
Grants and donations	8,933,147	9,827,951	894,804	25	27
Investment earnings	589,347	351,026	(238,321)	2	1
Fines, forfeitures and judgments	338,908	182,965	(155,943)	1	1
Flexible benefits contributions	56,505	58,630	2,125
Refunds	537,394	459,341	(78,053)	1	1
Other revenues	7,860	5,921	(1,939)
Totals	\$ 35,849,518	\$ 37,080,673	\$ 1,231,155	100	100

Revenue Sources - 1998

Revenue Sources - 1999

Revenues for governmental funds increased 3.4% over the previous year, while expenditures for governmental fund types totaled \$35.1 billion in fiscal year 1999, a 5.2% increase from the previous year. The amount of expenditures by function for fiscal years 1998 and 1999 are shown below (in thousands):

Function	Amount		Amount of Change	Percent of Total	
	1998	1999		1998	1999
Economic opportunities, agriculture and employment	\$ 922,992	\$ 1,021,778	\$ 98,786	3	3
Public safety	2,477,335	2,502,618	25,283	7	7
Education	9,034,923	9,313,666	278,743	27	27
Health and social concerns	11,778,321	12,796,260	1,017,939	35	36
Housing and community development	168,915	190,336	21,421	1	1
Natural resources and environmental management	614,329	596,885	(17,444)	2	2
Recreation and cultural opportunities	150,813	152,182	1,369
Transportation	871,040	794,309	(76,731)	3	2
Governmental direction and support services	3,754,842	4,374,662	619,820	11	12
Capital outlay	2,694,903	2,320,142	(374,761)	8	7
Debt service	904,607	1,032,219	127,612	3	3
Totals	\$ 33,373,020	\$ 35,095,057	\$ 1,722,037	100	100

Expenditures by Function - 1998

Expenditures by Function - 1999

Total fund balance at June 30, 1999, for all governmental fund types, was \$10.92 billion compared to \$9.92 billion at June 30, 1998. Of the June 30, 1999 fund balance, \$5.95 billion represents unreserved fund balance which is \$130 million less than the \$6.08 billion last year.

Proprietary Funds

The Department of the Lottery is the largest enterprise fund in the State. In comparison to the year ended June 30, 1998, combined enterprise fund operating revenues remained about the same at \$2.5 billion in 1999 and operating expenses remained about the same at \$1.5 billion. In addition to the Department of Lottery, other major enterprise funds account for the operations of the Department of Transportation's toll and turnpike facilities.

The Honorable Jeb Bush
February 4, 2000

Combined internal service fund operating revenues increased from \$995 million in 1998 to \$1.02 billion in 1999, while operating expenses decreased from \$1.06 billion in 1998 to \$976 million in 1999. The Department of Management Services has the largest internal service fund, and the principal services provided include the State Employees Health Insurance Program, facilities management, data processing, motor pool, and telephone communications.

Debt Administration

Florida maintains a high bond rating from Moody's Investors Services (Aa2), Standard and Poor's Corporation (AA+) and Fitch IBCA, Inc. (AA) on all State general obligation bonds. Outstanding general obligation bonds at June 30, 1999, totaled almost \$9.3 billion and were issued to finance capital outlay for educational projects of local school districts, community colleges and state universities, environmental protection and highway construction.

State general obligation bonds issued during the fiscal year ended June 30, 1999, were as follows (in thousands):

	Amount	Interest Rates
State Board of Education		
PECO Series 1997-B	\$ 240,200	4.000 to 6.000%
PECO Series 1998-A	\$ 250,000	4.750 to 6.000%
PECO Series 1998-B	\$ 224,595	4.200 to 5.250%
PECO Series 1998-C	\$ 220,370	4.000 to 5.250%
PECO Series 1998-D	\$ 226,375	3.500 to 5.250%
PECO Series 1999-A	\$ 220,485	4.000 to 6.000%
PECO Series 1999-B	\$ 139,525	3.750 to 5.250%
Capital Outlay Series 1999-A	\$ 74,085	4.000 to 4.750%
Department of Transportation		
Right-of-Way Acquisition Series 1999-A	\$ 279,315	4.000 to 5.250%

More detailed information about outstanding bonds can be found in the notes to the financial statements and statistical section of this report.

Retirement System

Assets available for benefits for the Florida Retirement System were \$96.2 billion at June 30, 1999. The latest actuarial valuation of the Florida Retirement System prepared as of July 1, 1999, indicated that the value of the assets available for benefits funded 113.45% of the actuarial accrued liability under the entry age normal cost method.

Economic Condition and Outlook

The national economic forecast indicates slower growth during the next two fiscal years. Real gross domestic product is expected to increase 3.5 percent in 1999-2000 and 2.6 percent in 2000-2001. Real private fixed nonresidential investment is anticipated to expand 9.1 percent in 1999-2000 and 5.5 percent the next year, while real consumption should increase 4.1 and 2.5 percent during the same periods. Underlying the official national economic forecast are key assumptions regarding fiscal policy, monetary policy, and prices. On the monetary side, the Federal Reserve increased the Federal funds rate in November 1999 as expected. Inflation, as measured by the Consumer Price Index, is expected to remain under control, averaging 2.8 percent in 1999-2000 and 2.2 percent in 2000-2001. The federal budget surplus (National Income and Product Account basis) is forecasted to be \$154.6 billion in 1999-2000 and \$179.2 billion the next year.

In other areas of the U.S. economy, construction activity will soften in 1999-2000 and continue to decrease in 2000-2001. Housing starts should reach 1.62 million in 1999-2000 and 1.5 million the next year. The stock market, as measured by the Standard and Poor's 500 index, is expected to increase 11.6 percent in 1999-2000 and 13.8 percent in 2000-2001. Employment is expected to expand 1.2 percent in 1999-2000 and 1.3 percent in 2000-2001. The unemployment rate is expected to average 4.2 percent in 1999-2000 and 2000-2001.

The Honorable Jeb Bush
February 4, 2000

While the Florida economy will also slow, it is expected to continue outperforming the U.S. Florida's real personal income is forecasted to increase 3.6 percent in 1999-2000 and 4.0 percent in 2000-2001. During this time, real personal income per capita will grow 1.6 and 2.1 percent.

Total nonfarm jobs are expected to increase 3.5 percent in 1999-2000, and 2.5 percent in 2000-2001, reaching more than 7.3 million in the latter fiscal year. Trade and services account for more than half of all nonfarm jobs. Service jobs are forecasted to grow 5.4 percent in 1999-2000, and 4.5 percent in 2000-2001. Trade jobs will grow 2.9 percent both years. Florida's unemployment rate is expected to be 3.8 percent in 1999-2000 and 4.1 percent in 2000-2001.

An important element of Florida's economic outlook is the construction sector. Florida's single and multi-family private housing starts are projected to slow over the next two years, falling to a combined total of 138,600 units in 1999-2000 and 134,900 units the following year. Multi-family starts have been slow to recover from the early 1990's recession, but they are showing strength with 56,700 starts in 1998-1999, they are expected to slow to 45,200 in 1999-2000 and 40,200 in 2000-2001. Single family starts are forecasted to be 93,400 in 1999-2000, and 94,700 the next year. Total construction expenditures will increase 3.5 and 0.8 percent during the two years.

Tourist arrivals are forecasted to increase 4.9 percent, to 51.2 million, in 1999-00 and 2.7 percent, to 52.6 million, the following year. Air tourists will increase 6.3 percent in 1999-2000 and 4.3 percent in 2000-2001, while auto tourists will increase 3.1 and 0.5 percent during the two fiscal years.

Year 2000

The State of Florida expended tremendous effort to prepare for the year 2000. Florida's state government identified 510 mission critical computer systems across 32 state agencies. These applications were tracked over 30 months and on December 14, 1999, all were deemed ready to perform properly in the year 2000 and beyond.

The State spent \$93.5 million preparing its state agencies for this event and in providing awareness for its citizens. Preparing for a worst case scenario, the State activated its Emergency Operations Center (EOC) to address any unanticipated circumstances. A portion of the State's year 2000 budgeted funds was held as a contingency to address any year 2000 problems or true emergency situations that developed. Fortunately, these resources were not needed. As a result, approximately \$10 million of unexpended funds will be returned to the Legislature at the end of the fiscal year 1999/2000. Due to the dedicated work of many state employees, Florida was well prepared for this event and experienced a very smooth transition into the year 2000 with no significant problems.

Tobacco Litigation Settlement

Florida's 1997 tobacco settlement, as amended in 1998, is expected to total approximately \$13 billion over a 25 year period. The settlement anticipates that the State of Florida will use the funds for children's health care coverage and other health-related services, to reimburse the State of Florida for medical expenses incurred by the State, and for mandated improvements in State enforcement efforts regarding the reduction of sales of tobacco products to minors. Additionally, the funds may be used for such purposes as the State match required to draw federal funds to provide children's health care coverage and for enhancement of children's and adolescents' substance abuse services, substance abuse prevention and intervention and children's mental health services.

As of June 30, 1999, the State had received approximately \$1 billion of the settlement. The Tobacco Settlement Clearing Trust Fund was created by law effective May 26, 1999, and unencumbered tobacco funds were deposited into the fund and invested by the State Board of Administration. Section 569.21, Florida Statutes, provides certain guidelines for the expenditure of funds received from the settlement. These guidelines primarily relate to the reduction of sales of tobacco products to minors. The Lawton Chiles Endowment Fund was created by Section 215.5601, Florida Statutes, and is funded by settlement moneys. The endowment will provide a perpetual source of funding for the future of children's health programs, child welfare programs, community-based health and human services initiatives, and biomedical research activities.

The Honorable Jeb Bush
February 4, 2000

Cash Management

The State Treasurer is responsible for investing the General Revenue Fund and certain trust funds. Authorized investments include certificates of deposits in Florida banks and savings and loan associations, direct obligations of the United States Treasury, commercial paper and bankers' acceptances, medium term corporate notes and commingled and mutual funds. The Treasurer is also designated as the cash manager for the State and operates a statewide cash concentration account in this capacity.

The Treasurer also serves as administrator of the Florida Security for Public Deposit Program. This program encompasses all governmental entities in the State. Participating banks and savings and loan associations guarantee government deposits and pledge collateral at levels varying between 50 and 125 percent. Acceptable collateral includes obligations of the United States Government and its agencies, obligations of the State of Florida and its political subdivisions, and obligations of several states.

Independent Audit

State law requires the Auditor General to conduct financial audits of the accounts and records of all State agencies. His examination is conducted in accordance with generally accepted governmental auditing standards, and his opinion is included as a part of this report. In addition to requirements of State statutes, an audit is conducted pursuant to the requirements set forth in the Federal Single Audit Act Amendments of 1996, and the related OMB Circular A-133. This report is issued separately.

Sincerely,

Comptroller

RFM:mcm

STATE OF FLORIDA

THE ELECTORATE OF FLORIDA

Florida's Constitution, in the traditional American pattern of "separation of power," divides the governmental structure of the state into three separate independent branches.

The Legislative Branch has exclusive law-making power and determines the general policies by which the problems of society are to be met. The Executive Branch, with the Governor as its chief, administers the laws made by the Legislature. The Cabinet shares some executive power and responsibilities with the Governor.

The Judicial Branch interprets the law and applies the Constitution.

AUDITOR GENERAL

February 4, 2000

The President of the Senate, the Speaker of the
House of Representatives, and the
Legislative Auditing Committee

INDEPENDENT AUDITOR'S REPORT ON GENERAL PURPOSE FINANCIAL STATEMENTS

We have audited the accompanying general purpose financial statements of the State of Florida, as of and for the fiscal year ended June 30, 1999, as listed in the table of contents. These general purpose financial statements are the responsibility of the State's management. Our responsibility is to express an opinion on these general purpose financial statements based on our audit. We did not audit the financial statements of the Legislature constituting less than 1 percent of assets and revenues of the General Fund; the Florida Department of the Lottery constituting approximately 44 percent and 84 percent of the assets and revenues, respectively, of the Enterprise Funds; nor did we audit the discretely presented component units (other than the State's community colleges, comprising approximately 91 percent and 96 percent of the assets and revenues, respectively, of the discretely presented community colleges component unit columns) as described in Note 1 to the general purpose financial statements. Those financial statements were audited by other auditors whose reports thereon have been furnished to us and our opinion on the general purpose financial statements, insofar as it relates to the amounts included for these entities, is based solely upon the reports of the other auditors.

Except as discussed in the following paragraph, we conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general purpose financial statements are free of material misstatement. The

financial statements of a material portion of the discretely presented component units (other than the State's community colleges) were not required to be audited in accordance with *Government Auditing Standards*. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the general purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall general purpose financial statement presentation. We believe that our audit and the reports of other auditors provide a reasonable basis for our opinion.

Records of the Board of Trustees of the Internal Improvement Trust Fund were not adequate to document the ownership and valuation of a substantial portion of land, which is stated at \$2.514 billion and constitutes 35.9 percent of the total value of general fixed assets reported in the General Fixed Assets Account Group at June 30, 1999. As a result, it was not practicable in the circumstances for us to determine whether the amount reported for land in the General Fixed Assets Account Group is fairly presented.

In our opinion, except for the effects of such adjustments, if any, as might have been determined to be necessary had we been able to examine adequate documentation regarding the amount reported for land in the General Fixed Assets Account Group, based on our audit and the reports of other auditors, the general purpose financial statements referred to above present fairly, in all material respects, the financial position of the State of Florida as of June 30, 1999, and the results of its operations, and the cash flows of its proprietary fund types, nonexpendable trust fund, and discretely presented component units for the fiscal year then ended in conformity with generally accepted accounting principles.

As discussed in Note 1 N to the financial statements, the State made an accounting change to begin reporting the financial activity and account balances of its risks of loss related to Federal civil rights actions, workers' compensation, court awarded attorney fees, automobile liability, and general liability in its general fund; and financial activity and account balances of its administration of the Federal Family Education Loan Program in an expendable trust fund.

The items discussed in the required supplementary information section, relating to the Year 2000 compliance issue and Pension Trust Fund, are not a required part of the general purpose financial statements, but are supplemental information required by the Governmental

Accounting Standards Board. We have applied certain limited procedures prescribed by professional auditing standards, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit and do not express an opinion on such information.

Our audit was made for the purpose of forming an opinion on the general purpose financial statements taken as a whole. The combining and individual fund and account group and discretely presented component units financial statements and schedules listed in the table of contents are presented for purposes of additional analysis and are not a required part of the general purpose financial statements of the State of Florida. Such information has been subjected to the auditing procedures applied in the audit of the general purpose financial statements and, in our opinion, except for the effects of such adjustments, if any, as might have been determined to be necessary had we been able to examine adequate documentation regarding the amount reported for land in the General Fixed Assets Account Group, based upon our audit and reports of other auditors is fairly presented in all material respects in relation to the general purpose financial statements taken as a whole. The information included in the introduction and the statistical and economic data listed in the table of contents was not audited by us and, accordingly, we do not express an opinion on such information.

In accordance with *Government Auditing Standards*, we have also issued our report dated February 4, 2000, on our consideration of the State of Florida's internal control over financial reporting and our tests of its compliance with certain provisions of laws, administrative rules, regulations, contracts, and grants. This report is included as part of our separately issued Report on the Audit of the General Purpose Financial Statements of the State of Florida, audit report No. 13592, dated February 4, 2000.

Respectfully submitted,

James M. Dwyer, CPA
Auditor General

General Purpose

Fort Zachery Taylor

STATE OF FLORIDA

NOTES TO THE FINANCIAL STATEMENTS FOR THE FISCAL YEAR ENDED JUNE 30, 1999

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following summary of Florida's significant accounting policies is presented to assist the reader in interpreting the financial statements. These policies should be viewed as an integral part of the accompanying financial statements.

A. Reporting Entity

The State of Florida reporting entity consists of the State's legislative agencies; the Governor and Cabinet; the State departments, commissions, and boards of the Executive Branch; and the various offices relating to the Judicial Branch of State government. Component units, legally separate organizations for which the State is financially accountable, are also included in the State's reporting entity.

Criteria for defining the reporting entity are identified and described in the Governmental Accounting Standards Board's (GASB) *Codification of Governmental Accounting and Financial Reporting Standards*, Sections 2100 and 2600. These criteria were used to evaluate potential component units for which the State is financially accountable and other organizations for which the nature and significance of their relationship with the State are such that exclusion would cause the State's financial statements to be misleading or incomplete. GASB has set forth criteria to be considered in determining financial accountability. These criteria include appointing a voting majority of an organization's governing body and (1) the ability of the State to impose its will on that organization or (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the State. Additional information pertaining to the individual component units can be obtained from:

**The Bureau of Accounting
101 East Gaines Street
Room 414, The Fletcher Building
Tallahassee, Florida 32399
(850) 410-9951**

B. Basis of Presentation

The State's financial statements have been prepared in accordance with generally accepted accounting principles as prescribed by the Governmental Accounting Standards Board and present the financial data of the State of Florida (the primary government) and its component units. The component units are included in the State's reporting entity because of the significance of their operational or financial relationships with the State.

The financial position of the State University System is presented in a separate column on the Combined Balance Sheet - All Fund Types, Account Groups and Discretely Presented Component Units in recognition that the accounting principles applied to the State University System fund types differ materially from those applied to the State's other fund types and account groups. The Combined Statement of Changes in Fund Balances and the Combined Statement of Current Funds Revenues, Expenditures, and Other Changes follow a form recommended by the National Association of College and University Business Officers and the American Institute of Certified Public Accountants (AICPA). The Combined Statement of Current Funds Revenues, Expenditures, and Other Changes is a statement of financial activities of current funds related to the current reporting period. This statement does not purport to present the results of operations or the net income or loss for the period as would a statement of income or a statement of revenues and expenses.

Total columns on the accompanying combined financial statements are captioned "Memorandum Only" because they are presented only to facilitate financial analyses. Inasmuch as the total columns include fund types, account groups, and discretely presented component units that use different bases of accounting, include both restricted and unrestricted amounts, and include interfund transactions that have not been eliminated, data in the total columns are not intended to present financial position, results of operations, or changes in financial position in conformity with generally accepted accounting principles. Such data is not comparable to a consolidation.

STATE OF FLORIDA

BLENDED COMPONENT UNITS

Blended component units are reported as though they are part of the State. GASB Statement No. 14 requires a component unit to be included in the State's financial statements using the blending method in either of these circumstances:

The component unit's governing body is substantively the same as the governing body of the State.

The component unit provides services entirely, or almost entirely, to the State or otherwise exclusively, or almost exclusively, benefits the State even though it does not provide services directly to it.

The State has two new blended component units included in the financial statements for fiscal year ended June 30, 1999. The Investment Fraud Restoration Financing Corporation was created by Section 517.1204, Florida Statutes (F.S.), as a nonprofit benefit corporation for the purpose of financing the remedial measures instituted by the Legislature with respect to the victims of GIC Government Securities, Inc., and the payment of approved claims. The Florida Surplus Lines Service Office was created to carry out duties regarding the oversight of the surplus lines insurers and their agents as provided in Section 626.921, F.S.

DISCRETELY PRESENTED COMPONENT UNITS

Component units that are not blended are discretely presented. Discrete presentation entails reporting component unit financial data in a column(s) separate from the financial data of the State. The following is a description of the State's discretely presented component units:

Community Colleges

Chapter 240, F.S., provides for 28 community colleges located throughout the State. Section 240.305, F.S., establishes the State Board of Community Colleges of the Department of Education. The Board is comprised of the Commissioner of Education, 1 student, and 11 lay citizens appointed by the Governor, approved by four members of the State Board of Education, and confirmed by the Senate. The community colleges follow the same accounting principles as the State University System. Due to the significance of the community colleges, they are displayed in a separate column from the remaining component units on the combined balance sheet.

Other Component Units

Financial data of discretely presented component units, other than community colleges, are included in the "other" column of the combined balance sheet. Additional condensed financial statement disclosures for "other" component units are included in Note 26 under the following categories:

Environmental

Water Management Districts – Section 373.069, F.S., created five water management districts in the State. The special districts have a fiscal year-end of September 30. The purpose of these districts is to protect property and the inhabitants in the districts against the effects of water, either from its surplus or deficiency. The Governor, subject to confirmation by the Senate, appoints members of the governing boards. Section 373.503(1), F.S., states that "the general regulatory and administrative functions of the districts...should fully or in part be financed by general appropriations."

Educational

University Direct-Support Organizations - Section 240.299, F.S., defines a direct-support organization (DSO) as an organization which is a Florida corporation, not-for-profit, incorporated under the provisions of Chapter 617, F.S., and approved by the Department of State. Fiscal years are not dictated by State statute. DSOs are organized and operated exclusively to receive, hold, invest, and administer property and to make expenditures to, or for, the benefit of the State University System in the State of Florida. The Board of Regents must certify that these organizations are operating in a manner consistent with goals of the university and in the best interest of the State. Any organization which is denied certification cannot use the name of the university which it seeks to serve.

STATE OF FLORIDA

Transportation

Transportation/Expressway Authorities - Any county, or two or more contiguous counties located within a single district of the Department of Transportation, may, by resolution adopted by the board of county commissioners, form an expressway authority which shall be an agency of the State, pursuant to the Florida Expressway Authority Act.

Community Affairs

Florida Housing Finance Corporation - Section 420.504, F.S., created the Florida Housing Finance Corporation within the Department of Community Affairs as an entrepreneurial public corporation organized to provide and promote the public welfare by administering the governmental function of financing or refinancing housing and related facilities in Florida.

Other

Additional Discretely Presented Component Units - Component units of the State also include various foundations, not-for-profit corporations, and direct-support organizations. The fiscal years of these component units may vary.

JOINT VENTURES

A joint venture is a legal entity or other organization that results from a contractual arrangement and that is owned, operated, or governed by two or more participants as a separate and specific activity subject to joint control, in which the participants retain (1) an ongoing financial interest or (2) an ongoing financial responsibility. The purpose of a joint venture is to pool resources and share the costs, risks, and rewards of providing goods or services to venture participants directly, or for the benefit of the general public or specific service recipients. Financial data for the joint ventures in which the State participates is not included in these statements. To obtain additional information pertaining to these joint ventures, please refer to Note 1A. The following are descriptions of the State's joint ventures:

Regional Planning Councils - Sections 186.501-513, F.S., the "Florida Regional Planning Council Act," create regional planning agencies to assist local governments in resolving their common problems. The regional planning councils are designated as the primary organization to address problems and plan solutions that are of greater-than-local concern or scope. The State has 11 regional planning councils. Participants in these councils have no equity interest but are required by statutes to contribute to the support of these programs.

Board of Control for Southern Regional Education - Sections 244.01-03, F.S., promote the development and maintenance of regional education services and facilities in the southern states to provide greater educational advantages and facilities for the citizens in the region. The states established a joint agency called the Board of Control for Southern Regional Education to submit plans and recommendations to the states from time to time for their approval and adoption by appropriate legislative action for the development, establishment, acquisition, operation, and maintenance of educational facilities in the region. There is no equity interest in this joint venture. Support for the Board is appropriated each year.

Southern Growth Policies Agreement - Section 23.140, F.S. - This agreement is intended to assist southern states in meeting their own problems by enhancing their abilities to recognize and analyze regional opportunities and take account of regional influences in planning and implementing their public policies. Appropriation requests under any budget are apportioned among the party states to support operations of the agreement, indicating an ongoing financial responsibility by the party states.

Southern States Energy Compact - Section 377.711, F.S., enacted this compact into law joining the State of Florida and other states to recognize that proper employment and conservation of energy, and employment of energy-related facilities, materials, and products can assist substantially in the industrialization of the South and the development of a balanced economy in the region. Funds are appropriated by the Legislature to support Florida's participation in the compact.

Dade County Expressway Authority - Chapter 348, Part 1, F.S. - The Dade County Expressway Authority was created and established pursuant to the Florida Expressway Authority Act. It has the powers to acquire, hold, construct, improve, maintain, operate, own, and lease an expressway system. Its governing body consists of appointments by the State and county and the State has an indirect ongoing financial interest in the Authority.

STATE OF FLORIDA

Apalachicola-Chattahoochee-Flint River Basin (ACFRB) Commission - Section 373.71, F.S. - The Commission was created as an interstate administrative agency to promote interstate comity, remove causes of present and future controversies, equitably apportion the surface waters of the ACFRB, and engage in water planning. Operational funding required by the Commission is equally shared among the party states. There is no equity interest in this joint venture.

RELATED ORGANIZATIONS

Organizations for which a primary government is accountable because that government appoints a voting majority of the board, but is not financially accountable, are related organizations. Examples of such organizations include selected hospital districts, port authorities, and aviation authorities. Since the State is not financially accountable for any of these organizations, applicable financial data is not shown. To obtain additional information pertaining to these related organizations, please refer to Note 1A.

C. Fund Accounting

The State of Florida's accounting systems are organized on the basis of funds and account groups. A fund is a fiscal and accounting entity having a self-balancing set of accounts for recording assets, liabilities, fund equity, revenues, either expenditures or expenses depending on the fund type, and other financing sources and uses.

Governmental fund types, proprietary fund types, fiduciary fund types, and account groups are used to record transactions relating to all State activities, except those pertaining to the State University System. State University System transactions are recorded in fund types as described in the AICPA College Guide model which is an acceptable alternative provided by GASB Statement No. 15, *Governmental College and University Accounting and Financial Reporting Models*. The aforementioned funds and account groups are described below.

GOVERNMENTAL FUND TYPES

General Fund - The general fund is the principal fund used to account for general governmental activities of the State. All financial transactions not required to be accounted for in other funds are accounted for in the general fund.

Special Revenue Funds - Special revenue funds are used to account for revenues which are legally restricted to expenditures for specific purposes. Principal sources of legally restricted revenues are motor fuel taxes and Federal grants.

Capital Projects Funds - Capital project funds are used to account for resources used for the acquisition or construction of major capital facilities other than those financed by enterprise funds, internal service funds, or trust funds.

Debt Service Fund - The debt service fund is used to account for resources earmarked to pay principal, interest, and service charges on general long-term debt.

PROPRIETARY FUND TYPES

Enterprise Funds - Enterprise funds are used to account for activities: (1) that are financed and operated in a manner similar to private business enterprises where the costs of providing goods or services to the general public on a continuing basis are to be financed or recovered primarily through user charges or (2) where the periodic determination of revenues earned, expenses incurred, and/or net income is appropriate. Certain segment information relative to enterprise funds is presented in Note 18.

Internal Service Funds - Internal service funds are used to account for the financing of goods or services provided by one department to other departments or other governmental units on a cost-reimbursement basis.

FIDUCIARY FUND TYPES

Fiduciary funds consist of expendable, nonexpendable, pension, and investment trust funds and agency funds which are used to account for financial resources held or administered by the State in a trustee capacity or as an agent for individuals, private organizations, other governmental units, or other funds. Each trust fund is classified for accounting measurement purposes as either a governmental-type fund or a proprietary-type fund. Accordingly, expendable trust funds are accounted for in the same manner as governmental funds, whereas the

STATE OF FLORIDA

nonexpendable, pension, and investment trust funds are accounted for in the same manner as proprietary funds. Agency funds are purely custodial in nature; that is, all assets are held for others. Therefore, assets equal liabilities. Accounting for an agency fund does not involve measuring results of operations.

ACCOUNT GROUPS

The general fixed assets account group is used to establish accounting control for general fixed assets. General fixed assets are usually acquired with resources of governmental fund types and used in association with governmental fund activities. Fixed assets of the proprietary-type funds are reported within those funds.

The general long-term debt account group is used to establish accounting control for unmatured long-term debt and other obligations of governmental fund types not paid with current resources. Obligations of funds using proprietary fund accounting are reported as liabilities in those funds rather than in the general long-term debt account group.

The account groups are not funds. They consist of self-balancing sets of accounts and are used only to establish accounting control over general fixed assets and general long-term obligations. Account groups are not used to account for available resources, the acquisition of fixed assets, or payment of liabilities.

STATE UNIVERSITY SYSTEM FUND TYPES

Current Funds - Current funds are used to account for those economic resources which are expendable for operational purposes in performing the primary objectives of the State University System. Resources restricted by donors or other outside agencies for specific current operating purposes are reported as restricted current funds; resources not so restricted are reported as unrestricted current funds.

Loan Funds - Loan funds are used to account for loans to students and the resources available for such loans. The terms of the loan agreements with donors usually specify that the money be used on a revolving basis; that is, repayments of principal and interest by a student borrower are restored to the fund and loaned to other students.

Endowment Funds - Endowment funds are used to account for gifts which the donors or outside agencies have stipulated, as a condition of the gift, that the principal is to be maintained inviolate in perpetuity and invested for the purpose of producing income. The income from these investments is reported in the fund in which it is to be used.

Unexpended Plant Funds - Unexpended plant funds are used to account for unexpended resources received from various sources to finance the acquisition of long-lasting plant assets and liabilities associated with those resources.

Renewals and Replacements Plant Funds - Renewals and replacements plant funds are used to account for resources to be used to provide for the renewal and replacement of plant fund assets as distinguished from resources used for additions and improvements to plant.

Retirement of Indebtedness Funds - Retirement of indebtedness funds are used to account for the accumulation of resources to be used for payment of principal and interest and other debt service charges, including contributions for sinking funds, relating to plant fund indebtedness.

Investment in Plant Fund - The investment in plant fund is used to account for all long-lasting assets and their associated liabilities used in activities of the State University System, except for the assets accounted for as investments in endowment funds. This fund includes all construction in progress at June 30.

Agency Funds - The agency funds are used to account for and report funds held by the institutions of the State University System as custodian or fiscal agent for others.

D. Basis of Accounting

Basis of accounting refers to when revenues, expenditures or expenses, transfers, and the related assets and liabilities are recognized in the accounts and reported in the financial statements. Basis of accounting relates to the timing of the measurements made, regardless of the nature of the measurement. The accounting and financial reporting treatment applied to a fund is determined by its measurement focus.

STATE OF FLORIDA

All governmental fund types, expendable trust funds, and agency funds are accounted for using the modified accrual basis of accounting. Revenues, except for certain grant revenues, are recognized when they become measurable and available to finance expenditures of the current period. When grant terms provide that the expenditure of funds is the primary factor for determining eligibility for grant funds, revenue is recognized at the time the expenditure is made.

Expenditures are recognized under the modified accrual basis of accounting when the related fund liability is incurred. Exceptions to this general rule include: (1) expenditures for insurance and similar services extending over more than one accounting period generally are not allocated between or among accounting periods but usually are accounted for as expenditures of the period of acquisition and (2) principal and interest on general long-term debt are recognized when due.

The measurement focus of the governmental fund types and expendable trust funds is the current financial resources method which emphasizes the determination of financial position and changes in financial position, rather than net income determination. Only current assets and current liabilities are generally accounted for in these funds.

All proprietary fund types, State University System fund types, and the nonexpendable, pension, and investment trust funds are accounted for using the accrual basis of accounting. Revenues are recognized when earned and expenses or expenditures, as applicable, are recognized when incurred. An exception to this general rule for revenue recognition may occur in State University System restricted current funds when expenditures are made for current operating purposes. The measurement focus of the State University System fund types is on the status of funds and on the flow of resources through the fund entities. The primary obligation of accounting and reporting in the State University System fund types is accounting for resources received and used rather than a determination of net income.

The measurement focus of the proprietary fund types and the nonexpendable, pension, and investment trust funds is on a flow of economic resources method which emphasizes the determination of net income, financial position, and cash flows. All fund assets and liabilities, current and noncurrent, are accounted for on the balance sheet. Each proprietary fund has the option under Governmental Accounting Standards Board (GASB), Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting* to elect to apply all Financial Accounting Standards Board (FASB) pronouncements issued after November 30, 1989, unless FASB conflicts with GASB. The State of Florida has elected to not apply FASB pronouncements issued after the applicable date.

To the extent that State University System current funds are used to finance plant fixed asset acquisitions, the amount so provided is accounted for as: (1) expenditures, in the case of normal replacement of movable equipment and library books; (2) mandatory transfers, in the case of required provisions for debt amortization, interest, and equipment renewal and replacement; and (3) transfers of a nonmandatory nature for all other cases. Transfers are recognized by all funds affected in the accounting period in which the interfund receivable and payable arise.

E. Encumbrances

Encumbrance accounting, under which purchase orders, contracts, and other commitments for the expenditure of money are recorded in order to reserve that portion of the applicable appropriation, is employed as an extension of formal budgetary integration in the general, special revenue, capital projects, expendable trust, and State University System funds. Encumbrances outstanding at fiscal year-end are reported as reservations of fund balances.

F. Reserves of Fund Balance

Reserves are established to indicate that a portion of fund balance is not appropriable or is legally segregated for specific future use. The types of reserves of the State's fund balances are described as follows:

Reserve for encumbrances - represents outstanding purchase orders, contracts, and other commitments.

Reserves for inventory, advances, and long-term receivables - represents fund assets that are not expendable financial resources.

Reserve for debt service - represents fund assets restricted for payment of debt service.

Reserve for endowment principal - represents trust fund assets that must be held in perpetuity by the donee.

STATE OF FLORIDA

Reserve for employees' pension benefits - represents cumulative assets available and restricted for the payment of obligations of the pension plans. The reserve captures the difference between total pension assets and liabilities at the reporting date.

Reserve for Investment Trust Fund participants - represents the net assets held in trust for pool participants.

Other reserves - represents fund assets restricted for various reasons including donor-imposed restrictions and statutory guidelines.

G. Cash and Cash Equivalents

Cash includes cash on hand and on deposit in banks, including demand deposits, time deposits, and certificates of deposit. Most deposits are held by financial institutions qualified as public depositories under Florida law. Cash equivalents are short-term, highly liquid investments. For the purposes of *GASB Codification Section 2450, Cash Flow Statements*, pooled investments with the State Treasury include cash equivalents.

H. Investments

Investments, other than investments of the Local Government Surplus Funds Trust Fund and the Debt Service Escrowed Fund, are reported at fair value at the reporting date. The investments of the Local Government Surplus Funds Trust Fund, a Securities and Exchange Commission Rule 2a7-like external investment pool, are reported at amortized cost. The investments of the Debt Service Escrowed Fund, which meet the requirements of a legal or in-substance defeasance, are reported at cost. Cash deposited in the State Treasury is to be kept fully invested pursuant to Section 18.10(1), F.S. The State Treasury is responsible for safekeeping and servicing moneys and securities required to be deposited as collateral by insurers and agents as a prerequisite to doing business in the State. Securities held solely in a custodial capacity for non-State entities are not reported on the State's combined balance sheet. The State invests moneys in various investment vehicles including derivatives, as authorized by Florida Statutes. Details of these investments are included in Note 3.

I. Inventories

With the exception of the State University System inventories as discussed below, most inventories consist of expendable supplies, although the inventories in some funds include small quantities of goods purchased for resale.

Methods of recording expenditures for inventories include both the consumption method and the purchases method, depending on the type of inventory and individual department accounting policy. Under the consumption method, inventories are recorded as expenditures when used or consumed. Under the purchases method, inventories are recorded as expenditures when purchased rather than when subsequently used. Inventories accounted for using the purchases method are included on the combined balance sheet by recording an offsetting reservation of fund balance for the value of such inventories reported.

Accounting methods, including valuation, vary for different inventories. The most common are described below:

General Fund and Special Revenue Funds - Inventories of the general fund and special revenue funds utilize either the purchases or consumption method and are valued using various methods of determining cost.

Proprietary Fund Types - Inventories of proprietary fund types are accounted for using either the consumption or purchases method and are valued using various methods of determining cost.

State University System Funds - Inventories reported by the State University System consist of expendable supplies and goods for resale. Both categories of inventories are expended when consumed or sold. Most of the inventories are valued at cost using the last-invoice-price method of determining cost.

J. Fixed Assets and Depreciation

Expenditures for fixed assets acquired or constructed for general governmental purposes are reported in the governmental fund types and expendable trust funds that financed the acquisition or construction. The fixed assets so acquired are capitalized (recorded) at cost in the general fixed assets account group, except for public domain (infrastructure) general fixed assets which are not capitalized. General fixed assets are not depreciated and interest expenditures during construction are not capitalized.

STATE OF FLORIDA

Fixed assets acquired or constructed by proprietary fund types, the nonexpendable trust fund, and the pension trust fund are capitalized in the fund financing the acquisition or construction. The fixed assets are recorded at cost and depreciated principally on a straight-line basis over useful lives ranging from 15 to 50 years for buildings and improvements and 3 to 20 years for machinery, equipment, and library resources. Net interest costs are capitalized during the construction period. Revenue-producing toll facilities (roads and bridges) are recorded as "improvements other than buildings." State University System fixed assets are generally stated at cost and are not depreciated.

Not included in reported fixed assets are the collections at various historic sites and museums throughout the State. For example, the Florida Museum of Natural History at the University of Florida contains collections of biological, archaeological, geologic, and ethnographic items. The Museum of Florida History, located in Tallahassee, currently has artifacts illustrating the history of Florida since the arrival of human beings on the peninsula. It also has access to collections that include Florida upland and underwater archaeology, Florida archives, and Florida and Spanish colonial numismatics. Although these collections are considered irreplaceable and quite valuable, no attempt has been made to place a dollar value on them.

K. Long-Term Debt

Long-term obligations that will be financed from resources to be received in the future by governmental fund types and most expendable trust funds are reported in the general long-term debt account group, not in individual funds. Long-term obligations to be financed from proprietary fund types, the nonexpendable trust fund, the pension trust fund, the State University System funds, and the Florida Prepaid College Trust Fund and the Special Disability Trust Fund (expendable trust funds) are recorded in the applicable funds rather than in the general long-term debt account group.

L. Compensated Absences

Employees earn the right to be compensated during absences for vacation and illness as well as for unused special compensatory leave earned for hours worked on legal holidays and other specially authorized overtime. Compensated absences for annual leave are recorded as a liability when the benefits are earned. Compensated absences for sick leave are calculated based on the vesting method. Within the limits established by law or rule, the value of unused leave benefits will be paid to employees upon separation from State service.

In governmental fund types and expendable trust funds, the expenditure for leave benefits is recognized when payments are made to employees; however, a long-term liability for unused vacation and calculated sick leave benefits is recorded in the general long-term debt account group.

In proprietary fund types, the nonexpendable trust fund, and the pension trust fund, the cost of vacation and calculated sick leave benefits is recognized (accrued) in the period they are earned and the corresponding liability for payment of such obligations is recorded in the applicable fund rather than in the general long-term debt account group.

The compensated absences liability of the State University System is recorded in the unrestricted funds. Although the State University System liability is expected to be funded primarily from future appropriations, generally accepted accounting principles for universities following the AICPA College Guide model do not permit the recording of a receivable in the unrestricted current funds in anticipation of future appropriations.

In all funds and the general long-term debt account group, the compensated absences amounts are based on June 30, 1999, salary rates and include employer social security and pension contributions at current rates.

M. Nonmonetary Transactions

Florida participates in various activities which are, in part, represented by nonmonetary transactions. The majority of these nonmonetary transactions are reported within the receiving governmental funds of the State's reporting entity. Examples include nonmonetary assistance in the form of Federal grants, such as food stamps and donated food commodities. The State also acts as an agent for the United States Department of Agriculture in the distribution of donated food commodities to qualifying organizations outside the State reporting entity. Transactions relating to this activity are not reported in the accompanying financial statements.

State Attorneys and Public Defenders of the State of Florida are furnished certain office space and other services by counties under the provisions of Chapter 27, Florida Statutes. Some counties also provide certain

STATE OF FLORIDA

facilities and services to other officers and staff of the judicial branch. The value of these services provided by the counties is not reported as a revenue.

N. Reporting Changes

Effective July 1, 1998, the State began reporting its Casualty Insurance Risk Management Trust Fund as part of its general fund operations and account balances rather than an internal service fund activity. The Fund provides insurance for the risks of loss related to Federal civil rights actions, workers' compensation, court awarded attorney fees, automobile liability, and general liability. Based upon the method of funding and paying claims for this activity, it was determined that the operations of the Fund would be more accurately represented as a general fund activity, as further discussed in Note 15B.

During the 1998-99 fiscal year, Federal legislation and United States Department of Education regulations imposed additional restrictions on the use of assets to administer the Federal Family Education Loan Program. As a result of the additional restrictions, the operations and account balances previously reported in a special revenue fund were reclassified to an expendable trust fund, as further discussed in Note 17.

NOTE 2 - BUDGETARY PROCESS, REPORTING, AND GAAP RECONCILIATION

A. Budget Process

Chapter 216, Florida Statutes, promulgates the process used to develop the budget for the State of Florida. By September 1 of each year, the head of each State agency and the Chief Justice of the Supreme Court for the Judicial Branch submit a final annual legislative budget request to the Governor and Legislature. Then, at least 45 days before the scheduled annual legislative session in each year, the Governor, as Chief Budget Officer, submits his recommended budget to each legislator.

The Governor also provides estimates of revenues sufficient to fund the recommended appropriations. Estimates for the General Revenue Fund, Budget Stabilization Fund, and Working Capital Fund are made by the Revenue Estimating Conference (see the description of the budgetary basis fund types in the next section). This group includes members of the Executive and Legislative branches with forecasting experience who develop official information regarding anticipated state and local government revenues as needed for the state budgeting process. In addition to the Revenue Estimating Conference, other consensus estimating conferences cover national and state economics, national and state demographics, the state public education system, criminal justice system, social services system, transportation planning and budgeting, the child welfare system, the juvenile justice system, and the career education planning process.

Trust fund revenue estimates are generally made by the agency that administers the fund. These estimates are reviewed by the Governor and then incorporated into his recommended budget.

The Governor's recommended budget forms the basis of the appropriations bill. As amended and approved by the Legislature (subject to the line-item veto power of the Governor and override authority of the Legislature), this bill becomes the General Appropriations Act.

The Governor and the Chief Justice of the Supreme Court may, under certain conditions, establish releases for amounts not appropriated by the Legislature to agencies and the Judicial Branch, respectively. These releases, called additional appropriations, are made primarily for nonoperating disbursements, such as the purchase of investments and the transfer of money between State funds.

The State Comptroller, as Chief Fiscal Officer, approves disbursements in accordance with legislative authorizations, which are set forth in the Statement of Intent. The budget is controlled at the account code level, which is defined as an appropriation category (e.g., salaries) within a budget entity. The Governor and the Comptroller are responsible for detecting conditions which could lead to a deficit in any agency's funds and reporting that fact to the Administration Commission and the Chief Justice of the Supreme Court. The Constitution of the State, Article VII, Section 1(d), states, "Provision shall be made by law for raising sufficient revenue to defray the expenses of the State for each fiscal period."

The Legislature is responsible for annually providing direction in the General Appropriations Act regarding the use of the Working Capital Fund to offset General Revenue Fund deficits. Absent any specific direction to the contrary, the Governor and the Chief Justice of the Supreme Court shall comply with guidelines provided in

STATE OF FLORIDA

Section 216.221(5), F.S., for reductions in the approved operating budgets of the Executive Branch and the Judicial Branch.

If circumstances warrant, the head of a department or the Chief Justice of the Supreme Court may transfer appropriations (other than fixed capital outlay appropriations) but only to the extent of 5 percent of the original appropriation or \$25,000, whichever is greater. Transfers of general revenue appropriations in excess of 5 percent or \$25,000, whichever is greater, or for fixed capital outlay, must be approved by the Administration Commission or the Chief Justice of the Supreme Court. The Governor and the Chief Justice of the Supreme Court may approve transfers of expenditure authority within any trust fund for agencies and the Judicial Branch, respectively.

At the end of the fiscal year, any balance of an operating appropriation which has not been disbursed but is expended (recorded as a payable) or contracted to be expended (recorded as a reserve for encumbrances in governmental fund types), may be certified forward into the next fiscal year. Certifications forward for agencies and the judicial branch are subject to the approval of the Governor and the Chief Justice of the Supreme Court, respectively. Any undisbursed operating appropriation not certified forward reverts to the fund from which it was appropriated as of June 30. Any certified forward operating appropriation remaining after December 31 reverts and is available for reappropriation. Any unexpended appropriation balance for fixed capital outlay subject to, but not under the terms of a binding contract or a general construction contract prior to February 1 of the second fiscal year, or the third fiscal year if it is for educational facilities as defined in Chapter 235, F.S., or a construction project of the Board of Regents, shall revert on February 1 of such year to the fund from which appropriated and shall be available for reappropriation. Universities may carry forward certain unexpended appropriations up to 5 percent of their total operating budget, which are not subject to reversion.

The State of Florida is progressing toward full implementation of a performance-based budgeting system. Chapter 216, F.S., designates when each department will be phased into this new budgeting method. Some agencies are already subject to the performance-based budgeting standards and all agencies will be under this new system by the fiscal year ended June 30, 2002. With performance-based budgeting, a department receives a lump-sum appropriation from the Legislature for each designated program at the beginning of the year. The Governor for State agencies or the Chief Justice for the Judicial Branch is responsible for allocating the amounts among the traditional appropriation categories so that specified performance standards can be met. At any time during the year, the agency head or Chief Justice may transfer appropriations between categories within the performance-based program with no limit on the amount of the transfer in order for the designated program to accomplish its objectives.

B. Budgetary Basis of Accounting

The budgetary basis of accounting required by State law differs materially from the basis used to report revenues and expenditures in accordance with generally accepted accounting principles (GAAP). Appropriations are made from funds that are prescribed by law. These legal basis fund types (known as State funds) are the General Revenue Fund, numerous trust funds, the Budget Stabilization Fund, and the Working Capital Fund.

Certain moneys, known as local funds, available to agencies for their operations are maintained outside the State Treasury. Because the funds are located in banks outside of the State Treasury, budgetary authority and the disbursement of these funds are not controlled by the State Comptroller. For example, the State Board of Administration operates from such funds.

Budgetary basis revenues are essentially reported on the cash basis and include amounts classified by GAAP as other financing sources. Budgetary basis expenditures include disbursements, except those for prior year certified forwards, plus current year payables and encumbrances which are certified forward into the next fiscal year. They also include amounts classified by GAAP as other financing uses. State law requires prior year payables and encumbrances not certified forward to be paid from the current year budget. The presentation of the budgetary data excludes most fixed capital outlay projects. Many fixed capital outlay projects are funded on a multi-year basis since major construction projects require several years to complete. These are accounted for as capital projects funds. Appropriations are made in total the first year even though they are released and expended over a period of years as required by the projects. Although the State Transportation Trust Fund within the Department of Transportation is reported as a special revenue fund, the projects within the fund are primarily of a multi-year nature, generally requiring several years to complete and are accounted and appropriated for accordingly. Because of the multi-year nature of such projects, these multi-year fixed capital outlay projects and the State Transportation Trust Fund are not presented on the Combined Statement of Revenues, Expenditures, and Changes in Fund Balances - Budget and Actual (Budgetary Basis) - All Budgetary Fund Types. The total

STATE OF FLORIDA

expenditures for these fixed capital outlay projects for the fiscal year ended June 30, 1999, were \$137 million for general revenue and \$5.3 billion for trust funds.

State agencies maintain the accounting records used in financial statement preparation in accordance with GAAP. However, the State's accounting system has the capability of also accumulating financial data on the budgetary basis. Therefore, the Combined Statement of Revenues, Expenditures, and Changes in Fund Balances - Budget and Actual (Budgetary Basis) - All Budgetary Fund Types is presented using the following statutorily prescribed fund types: General Revenue, Trust, Budget Stabilization, and Working Capital Funds. Expenditures are presented by appropriation category and are divided between operating and nonoperating categories. This presentation reflects the actual appropriation process as adopted by the State.

Additional disclosures of budgetary basis financial information may be obtained from the State Comptroller's Office. Refer to Note 1A for correspondence information.

C. GAAP Reporting Reconciliation

The Combined Statement of Revenues, Expenditures and Changes in Fund Balances - Budget and Actual (Budgetary Basis) - All Budgetary Fund Types presents comparisons of the legally adopted budget with actual data on a budgetary basis. Since accounting principles applied for the purposes of developing data on a budgetary basis differ significantly from those used to present financial statements in conformity with generally accepted accounting principles, a reconciliation of fund balances for the fiscal year ended June 30, 1999, is presented in the following schedule (in thousands):

STATE OF FLORIDA

	GAAP BASIS FUND TYPES	
	General	Special Revenue
Budgetary basis fund balances:		
General Revenue	\$ 735,990	\$
Trust	8,945,684
Budget Stabilization	786,890
Working Capital	541,331
	2,064,211	8,945,684
Trust funds budgetary fund balances other than special revenue funds:		
Included in the general fund	13,572	(13,572)
Included in the proprietary fund types	(778,917)
Included in the trust and agency fund types	(3,150,201)
Included in the State University System funds	(734,509)
Security lending investments within the Treasury	434,143	299,630
Fair value adjustment to investments within the Treasury	(88,660)	(69,894)
Special investments within the Treasury	6,175	150,538
Budgetary basis fund balances within the GAAP basis fund types*	2,429,441	4,648,759
Non-treasury cash and investments	3,317	126,373
Receivables not certified forward (only certain expenditure refunds are certified forward)	1,616,526	2,734,542
Inventories and prepaid items	28,271	45,270
Liabilities not certified forward (accrual items not recognized in the certified forward process)	(700,136)	(3,145,176)
Encumbrances	150,129	654,036
GAAP basis fund balances of budgetary funds within the GAAP basis fund types	3,527,548	5,063,804
GAAP basis fund balances not included in the trust funds budgetary fund balances	835,450
GAAP basis fund balances of local (nonbudgetary) funds **	979,210
GAAP basis fund balances	<u>\$ 3,527,548</u>	<u>\$ 6,878,464</u>

NOTE 3 - DEPOSITS AND INVESTMENTS

A. Deposits

At June 30, 1999, the carrying amount of deposits totaled \$2,939,067,470 which consisted of the following: \$368,149,997 cash and cash equivalents in financial institutions; \$352,916,603 restricted cash and cash equivalents in financial institutions; and \$2,218,000,870 pooled investments with the State Treasury. The reported carrying amount of component unit deposits totaled \$360,828,006 which consisted of cash and cash equivalents in financial institutions.

STATE OF FLORIDA

Chapter 280, F.S., generally requires public funds to be deposited in a bank or savings association that is designated by the State Treasurer as authorized to receive deposits in the State and that meets the collateral requirements. Collateral in the amount of the greater of the average daily balance of public deposits multiplied by the depository's minimum collateral pledging level, established by the State Treasurer, or 25 percent of the average monthly balance of public deposits or 125 percent of the average daily balance of public deposits greater than capital, is required to be deposited with the State Treasurer as security for public deposits. Collateral may be held by another custodian with approval of the Treasurer if conditions are met which protect the State's interests. The amount of collateral may be increased to 125 percent of the average daily balance of public deposits if specified conditions exist. Eligible collateral includes federal, federally-guaranteed, state and local government obligations, and corporate bonds.

Statutes provide that if a loss to public depositors is not covered by deposit insurance and the proceeds from the sale of securities pledged by the defaulting depository, the difference will be provided by an assessment levied against other qualified public depositories of the same type as the depository in default.

Deposits held in trust that are fully secured under trust business laws, deposits that are fully secured under Federal regulations, and/or deposits that are outside the country are exempted from being placed with a qualified public depository. Also exempt are deposits of the System Trust Fund, which is used to administer the Florida Retirement System, and wire transfers and transfers of funds solely for the purpose of paying registrars and paying agents. A number of these deposits, however, are insured or collateralized.

The deposit balances reported by the State's banks totaled \$2,159,228,780. Of this amount, \$2,159,143,995 was covered by Federal and other depository insurance or the collateral pool described above and \$84,785 was uncollateralized. The deposit balances reported by component unit banks totaled \$392,346,650. Of this amount, \$283,293,587 was covered by Federal and other depository insurance or the collateral pool described above, \$59,799,978 was collateralized with securities held by the pledging financial institution's trust department in the Component Unit's name, and \$49,253,085 was uncollateralized.

B. Investments

The schedules below disclose the carrying value and fair value of each type of investment classified in categories of credit risk. These categories are as follows:

- a. Insured or registered, or securities held by the State or its agent in the State's name.
- b. Uninsured and unregistered, with securities held by the counterparty's trust department or agent in the State's name.
- c. Uninsured and unregistered, with securities held by the counterparty, or by its trust department or agent but not in the State's name.

Certain investments, such as mutual funds, cannot be categorized because they are not evidenced by securities that exist in physical or book entry form. Securities held by the other parties underlying security lending agreements also are not categorized.

1. Pooled Investments with the State Treasury

Unless specifically exempted by statute, all cash of the State must be deposited in the State Treasury. Certain component units are allowed by statute to deposit cash with the State Treasury. The State Treasury, in turn, keeps the funds fully invested to maximize interest earnings. Authorized investment types are set forth in Section 18.10, F.S., and include certificates of deposit, direct obligations of the United States Treasury, obligations of Federal agencies, asset-backed or mortgage-backed securities, commercial paper, bankers' acceptances, medium term corporate obligations, repurchase agreements, commingled and mutual funds, derivatives, negotiable certificates of deposit; and, subject to certain rating conditions, foreign bonds denominated in U.S. dollars and registered with the Securities and Exchange Commission (SEC) for sale in the United States and convertible debt obligations of any corporation domiciled within the United States.

State Treasury holdings at June 30 include \$65,536,360 held for component units. Deposits held by the State Treasury for component units are reported by the component units as "Due from primary" and may differ in amount due to different component unit reporting periods.

The State Treasury records as an investment, funds credited to the State's account in the Federal Unemployment Compensation Trust Fund pursuant to Section 903 of the Social Security Act. The fund is drawn

STATE OF FLORIDA

upon primarily to pay unemployment compensation benefits. This money is pooled with deposits from other states and is managed by the Federal Government. No disclosures can be made of specific securities owned.

Security Lending. State statutes authorize the State Treasury to participate in a security lending program. Agents of the State Treasury loan securities, including U.S. Government and federally-guaranteed obligations and bonds and notes to broker/dealers for collateral with a simultaneous agreement to return the collateral for the same securities in the future. Collateral for loaned securities cannot be less than 100 percent of the fair value of the underlying security plus accrued interest. Such collateral may consist of cash; government securities; unconditional, irrevocable standby letters of credit; or other assets specifically agreed to in writing. Cash collateral is invested by the agent in investments authorized by Section 18.10, F.S. Maturities of investments made with cash collateral generally are not matched to maturities of the securities loaned because security loan agreements are generally open-ended with no fixed expiration date. Since the collateral under security lending agreements (including accrued interest) exceeded the fair value of the securities underlying those agreements (including accrued interest), the Treasury had no credit risk exposure at June 30, 1999. If a situation occurs where an agent does not receive collateral sufficient to offset the fair value of any securities lent, or the borrowers fail to return the securities or fail to pay the State Treasury for income distributions by the securities' issuers while the securities are on loan, the agent is required to indemnify the State Treasury for any losses which might occur. The State Treasury does not have the ability to pledge or sell the non-cash collateral securities so the non-cash portion of the collateral held (U.S. Government and federally-guaranteed obligations valued at \$489,620,175) is not reported in the balance sheet.

Derivatives. The State invests in derivatives of asset-backed and mortgage-backed securities to improve yield. Investments in derivatives of mortgage-backed securities include various classes such as "Interest Only" and "Principal Only". These derivatives are based on cash flows from interest and principal payments on underlying mortgages. Therefore, prices of mortgage derivatives are highly sensitive to pre-payments by mortgagees caused by changing market conditions. The State utilized option contracts during the year but none were in force at June 30, 1999. In the following Schedule of Pooled Investments, the fair value of derivatives, \$1,346,035,176, is included in the pooled investments categorized as U.S. Government obligations and federal agencies and bonds and notes.

Detail of the holdings and a reconciliation to the memorandum total of the combined balance sheet, as well as the credit risk of investments held, is as follows (in thousands):

STATE OF FLORIDA

Schedule of Pooled Investments

	Risk Category		Fair Value

Pooled Investments with State Treasury (all fund types)			\$ 13,828,554
Restricted Assets (see Note 10)			352,899
Total			\$ 14,181,453

2. Other Investments

Florida Statutes allow investment of funds in a range of instruments including federally-guaranteed obligations, other Federal agency obligations, certain State bonds, commercial paper, obligations of a Florida political subdivision as permitted by law, common stock, repurchase and reverse repurchase agreements and real estate. Securities identified above may be loaned to securities dealers, provided the loan is collateralized by cash or United States government securities having a fair value of at least 100 percent of the fair value of the securities loaned. If bond proceeds are invested, investments must be made in accordance with bond covenants. These covenants usually require investment in federally-guaranteed obligations.

Through the State Board of Administration (SBA), various funds, primarily the Defined Benefit Pension Plan, the Investment Trust Funds, the Florida Lottery Trust Fund, the Florida Hurricane Catastrophe Fund and the Florida Prepaid College Trust Fund, participate in securities lending programs. The SBA held \$12,782,156,350 in cash and \$578,920,576 in U. S. Government securities as collateral for the lending programs as of June 30, 1999. At June 30, 1999, the collateral held for the security lending transactions exceeded the fair value of the securities underlying the agreements (including accrued interest) except for credit risk of \$65,535 in one of the security lending programs. All security lending programs have indemnity clauses requiring the lender to consume any losses from insufficient collateral. Maturities of investments made with cash collateral generally are not matched to maturities of the securities loans, due to securities loan agreements being open-ended with no fixed expiration date. As such, investments made with cash collateral are primarily in short-term investments. However, investments purchased for some security lending programs included investments with maturities of six months or more representing approximately 13 percent to 25 percent of total collateral invested. There are no restrictions on the amount of securities that can be loaned at one time to one borrower for the Defined Benefit Pension Plan. For the Investment Trust Funds, the SBA has adopted industry practice for SEC 2a7-like pools, which generally restricts lending activity to no more than one-third of the portfolio.

STATE OF FLORIDA

The SBA issued a separate report (financial statements and notes) pertaining to the State's Investment Trust Funds for the period ended June 30, 1999, as required by GASB Statement No. 31. Additional information pertaining to the Investment Trust Funds or a copy of the report may be obtained from the Chief Financial Officer, State Board of Administration of Florida, 1801 Hermitage Boulevard, Tallahassee, Florida 32308, (850) 488-4406.

The SBA has established investment policy guidelines for each portfolio within the Defined Benefit Pension Plan. Pursuant to these guidelines, derivative investment instruments are not to be used to speculate in the expectation of earning extremely high returns. Various derivative investment instruments are used as part of the investment strategy to hedge against interest rate risk, currency risk in foreign markets and mortgage-backed security prepayment risk, as well as for yield-curve strategy purposes, diversification, and the management of equity market exposure. Derivative investment instruments include futures, options, forward exchange contracts, floating rate notes, interest rate swaps, and mortgage-backed security derivative instruments such as collateralized mortgage obligations.

As of June 30, 1999, the Defined Benefit Pension Plan had investments reported at fair value in various derivative products as follows:

- ◆ 26,576 long and 25,637 short futures contracts open with United States Treasury Notes with a fair value of \$81,168,200 pledged as collateral against these contracts;
- ◆ 600 long put option contracts, 7,155 long call option contracts, 622.80 short put option contracts, 3,472.80 short call option contracts and 40,277 ten-year call options;
- ◆ Forward exchange contracts with a receivable balance of \$260,317,428 and discount of \$398,653 and a payable balance of \$260,259,047 with a premium of \$511,319;
- ◆ Interest rate swaps, mortgage index swaps, and mortgage index linked certificates with a fair value of \$710,242,143 and a cost of \$713,777,238;
- ◆ Mortgage-backed security derivative instruments with a fair value of \$523,894,238 and a cost of \$528,199,409; and
- ◆ Floating rate notes with a fair value of \$622,685,674 and a cost of \$621,159,049.

As of June 30, 1999, the Investment Trust Funds had investments in derivative products (floating rate notes) with a fair value of \$1,373,339,796 and a cost of \$1,373,486,522.

As of June 30, 1999, the Florida Hurricane Catastrophe Fund had investments in derivative products (floating rate notes) with a fair value of \$937,642,130 and a cost of \$936,240,482.

The investments of the Florida Prepaid College Program (an expendable trust fund) were held by the custodian which is also the counterparty.

The carrying value (securities reported at cost, amortized cost, and fair value) reported in the Other Investments Schedules for the primary government and component units are categorized as follows (in thousands):

Other fixed assets	275,032	(73)	35,122	345	309,736
Total	\$ 6,539,229	\$ 17,853	\$ 634,126	\$ 190,490	\$ 7,000,718

NOTE 7 - PENSIONS AND OTHER POSTEMPLOYMENT BENEFITS

The Florida Retirement System (FRS) was created December 1, 1970, with consolidation of the Teachers' Retirement System (Chapter 238, F.S.), the State and County Officers and Employees' Retirement System (Chapter 122, F.S.), and the Highway Patrol Pension Fund (Chapter 321, F.S.). In 1972, the Judicial Retirement System (Chapter 123, F.S.) was also consolidated with the FRS. The FRS was created by Chapter 121, F.S., to provide a defined benefit pension plan for participating public employees. Provisions relating to the FRS are also contained in Chapter 112, F.S.

Except for elected officers and members of the optional retirement programs, FRS membership is compulsory for all employees filling a regularly established position in a State agency, county agency, or district school board. Membership by elected State and county officers is optional. Participation by cities, municipalities, and special districts, although optional, is generally irrevocable after election to participate is made.

There are five general classes of membership as follows:

Regular Class - This class consists of members of the FRS who do not qualify for membership in the other classes.

Senior Management Service Class (SMSC) - This class consists of members in senior management level positions in State and local governments.

Special Risk Class - This class consists of members who are employed as law enforcement officers, firefighters, or correctional officers and meet the criteria to qualify for this class.

Special Risk Administrative Support Class - This class consists of Special Risk Class members who are transferred or reassigned to nonspecial risk law enforcement, firefighting, or correctional administrative support positions within an FRS special risk employing agency.

Elected Officers' Class (EOC) - This class consists of elected State, county, and some city and special district officers.

The FRS provides vesting of benefits after ten years (eight years for EOC members and seven years for SMSC members) of creditable service. Members are eligible for normal retirement when they have met the requirements listed below. Early retirement may be taken any time after vesting; however, there is a 5 percent benefit reduction for each year prior to normal retirement age.

Regular Members - Ten or more years of creditable service and age 62. Thirty years of creditable service regardless of age.

STATE OF FLORIDA

Senior Management - Seven years of SMSC service and age 62. Ten or more years of any creditable service and age 62. Thirty years of any creditable service regardless of age.

Special Risk (Including Administrative Support Class) - Ten or more years of Special Risk Class service and age 55. Twenty-five total years special risk service regardless of age. Thirty years of any creditable service regardless of age.

Elected Officers - Eight years of EOC service and age 62. Ten years of any creditable service and age 62. Thirty years of any creditable service regardless of age.

Benefits are computed on the basis of age, average final compensation, and service credit. Members are also eligible for in-line-of-duty or regular disability and survivors' benefits. Pension benefits are increased each July 1 by a 3 percent cost-of-living adjustment.

A Deferred Retirement Option Program (DROP) was established, effective July 1, 1998, subject to provisions of Section 121.091, Florida Statutes. It permits eligible employees who have reached their normal retirement date to defer receipt of monthly benefit payments while continuing employment with a FRS employer. An employee may participate in the DROP for a maximum of 60 months after becoming eligible to participate. During the period of DROP participation, deferred monthly benefits remain in the FRS pension trust fund and accrue interest. As of June 30, 1999, the FRS pension trust fund held \$400,499,850 accumulated benefits and interest for 18,930 participants in the DROP.

The FRS is a cost-sharing multiple-employer public-employee defined benefit pension plan administered by the Division of Retirement. Costs of administering the FRS are funded through interest earned on investments made for the pension trust fund. Reporting of the FRS is on the accrual basis of accounting. Revenues are recognized when earned and expenses are recognized when the obligation is incurred.

Investments are reported at fair value. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates. Mortgages are valued on the basis of expected future principal and interest payments and are discounted at prevailing interest rates for similar instruments. The fair value of real estate investments is based on independent appraisals. Investments that do not have an established market are reported at estimated fair value. No investment in any one organization represents 5 percent or more of the net assets available for pension benefits.

All participating employers must comply with statutory contribution requirements. Except in those instances where employees have elected to remain in pre-existing plans, employees make no contributions. Statutes require that the unfunded actuarial liability (UAL) be amortized within a 30-fiscal year period. The balance of legally required reserves for all defined benefit pension plans at June 30, 1999, was \$96,171,406,596. Of this amount, \$96,158,912,594 was attributable to the FRS and was reserved to provide for total current and future benefits, refunds, and administration of the FRS. Section 121.031(3), F.S., requires a biennial actuarial review of the FRS which is provided to the State Legislature as guidance for funding decisions. The conclusions of the review are included in the annual report of the FRS.

FRS Retirement Contribution Rates:

Membership Class	Rates Recommended by Actuarial Review as of 7/1/97 for Fiscal Year 1998-99	7/1/98 Statutory Rates (Ch. 121, F.S.)

Additional information about the FRS is contained in the various publications available from the Division of Retirement within the Department of Management Services.

A. Other Postemployment Benefits

Section 112.0801, F.S., provides that retirees may participate in their former employers' group health insurance programs. In general, premiums are paid by the retiree.

The Retiree Health Insurance Subsidy (HIS) established by Section 112.363, F.S., is to assist retirees of most State-administered retirement systems in paying health insurance costs. From July 1, 1998 through December 31, 1998, eligible retirees and beneficiaries received a monthly retiree health insurance subsidy payment equal to the number of years of creditable service completed at the time of retirement multiplied by \$3. The payments were at least \$30 but not more than \$90 per month. Beginning January 1, 1999, the payments were increased to \$5 per month for each year of credible service at retirement with a minimum of \$50 and a maximum of \$150 per month pursuant to Section 112.363, F.S. To be eligible to receive the HIS, a retiree under a State-administered retirement system must provide proof of health insurance coverage, which can include Medicare.

The HIS program is funded by required contributions from FRS participating employers. Employer contributions are a percentage of payroll for all active FRS employees and are added to the amount submitted for retirement contributions. HIS contributions are deposited in a separate trust fund from which HIS payments are authorized. Beginning July 1, 1998, the contribution rate was increased from 0.66 percent to 0.94 percent of payroll pursuant to Section 112.363, F.S. In the event contributions fail to provide subsidy benefits to all participants, the subsidy payments may be reduced or canceled. Additional information pertaining to the HIS is as follows:

STATE OF FLORIDA

	1997	1998	1999
HIS recipients as of 6/30/1999	134,871	142,548	150,014
HIS contributions for FY ending 6/30/1999	\$111,966,826	\$117,297,218	\$174,022,856
HIS payments for FY ending 6/30/1999	\$100,511,133	\$106,688,003	\$150,329,649
HIS trust fund net assets at 6/30/1999	\$49,065,272	\$62,144,173	\$89,387,807
HIS contribution rate as of 1/1/2000	0.66%	0.66%	0.94%

B. State of Florida Participation

The State of Florida contributed as required to the FRS as part of a cost-sharing multiple-employer public-employee defined benefit pension plan. For the fiscal year ended June 30, 1999, the State's total covered payroll for its 146,506 State employee members plus 5,749 State DROP participants amounted to \$4,522,838,219 with actual and required employer contributions totaling \$797,445,576 or 17.63 percent. The State's contributions to the FRS for the fiscal years ending June 30, 1997, and June 30, 1998 were \$779,139,574 and \$844,396,647, respectively. These amounts were also equal to the required contributions for each year. Covered payroll refers to all compensation paid by the State to active employees covered by the FRS on which contributions to the defined benefit pension plan are based. The State's contributions represented 25.76 percent of the total contributions required of all participating employers.

Employees' eligibility and benefits are as previously described. Contributions are by class based on Chapter 121, F.S., as previously described. Employees not filling regular established positions but working under other personal services (OPS) status are not covered by the FRS.

C. Optional Retirement Program (ORP)

Section 121.35, F.S., created the ORP for eligible State University System faculty and administrators. This program was designed to aid universities in recruiting employees who may not remain in the FRS long enough to vest. The ORP is a defined contribution plan which provides full and immediate vesting of all contributions paid on behalf of the participants to the participating provider companies to purchase contracts for retirement and death benefits. Employees in eligible positions are compulsory participants in the ORP unless they elect membership in the FRS.

The employing university contributes the same percentage of the participant's salary as would have been contributed to the FRS for Regular Class membership plus the HIS contribution, totaling 16.45 percent of covered payroll for July 1998 through June 1999. A portion (4.87 percent) of the total contribution is transferred to the FRS Trust Fund to help amortize the unfunded actuarial liability, 0.01 percent is for the administration of the program, and the remainder (11.57 percent) is paid to the provider companies designated by the participant. A participant may contribute by salary reduction an amount not to exceed the percentage contributed by the university for purchase of his or her annuity. Additional information pertaining to the ORP is as follows:

Members	10,185	
Payroll	\$ 553,584,485	
Contributions:		
Employee	\$ 27,297,448	4.93% of payroll
Employer	\$ 89,607,008	16.19% of payroll

D. Senior Management Service Optional Annuity Program (SMSOAP)

An optional retirement program for members of the Senior Management Service Class was created by Section 121.055, F.S. The SMSOAP is a defined contribution plan which provides full and immediate vesting of all contributions paid on behalf of the participants to the participating provider companies to purchase contracts for retirement and death benefits. Employees in eligible positions may make an irrevocable election to participate in the SMSOAP in lieu of the Senior Management Service Class. Employers contribute the same percentage of the participant's salary as would have been contributed to the FRS for Senior Management Service Class membership plus the HIS contribution, totaling 24.04 percent of covered payroll for July 1998 through June 1999. A portion (10.61 percent) of the total contribution is transferred to the FRS Trust Fund to help amortize the unfunded actuarial liability and the remainder (13.43 percent) is paid to the provider companies designated by the

STATE OF FLORIDA

participant. A participant may contribute by salary reduction an amount not to exceed the percentage contributed by the employer for purchase of his or her annuity. Additional information pertaining to the SMSOAP is as follows:

Members	93		
Payroll	\$ 7,502,300		
Contributions:			
Employee	\$ 26,315	.35% of payroll	
Employer	\$ 1,746,945	23.29% of payroll	

NOTE 8 - OTHER COMMITMENTS

A. Road and bridge construction projects supervised by the Department of Transportation are administered by the Department of Transportation work program, which is updated during each budget cycle. As of June 30, 1999, the Department had available approximately \$3.6 billion in budget authority arising from both current and prior year projects which represents amounts committed on executed contracts. Other major construction commitments of the State of Florida at June 30, 1999, are as follows (in thousands):

Agency	Total Estimated Cost at 06/30/1999	Amount Expended Through 06/30/1999	Estimated Amount Committed at 6/30/1999
Game and Fresh Water Fish Commission	\$ 4,805	\$ 661	\$ 4,144
Department of Labor and Employment Security	11,900	1,732	10,168
Department of Highway Safety and Motor Vehicles	1,368	1,298	70
Department of Military Affairs	706	26	680
Office of the State Courts Administrator	923	84	839
Department of Agriculture and Consumer Services	2,844	2,042	802
Department of Veterans' Affairs	24,382	10,278	14,104

Department of Juvenile Justice	139,052	66,552	72,500
Department of Corrections	223,996	91,533	132,463
State University System	1,087,357	589,552	497,805
Total	\$ 1,692,792	\$ 867,953	\$ 824,839

B. The State has enacted legislation obligating it to remit annually \$15 million to a designated trustee for the purpose of repaying the debt on certain Florida Ports Financing Commission revenue bonds. The Florida Ports Financing Commission is not part of the State's reporting entity. These revenue bonds do not create or constitute a legal obligation or debt of the State. Funding for the annual remittance comes from the State of Florida, Department of Transportation's portion of motor vehicle registration fees, which were in excess of \$341 million for the fiscal year ended June 30, 1999. Florida Ports Financing Commission revenue bonds outstanding as of June 30, 1999, amounted to \$208,838,467.

STATE OF FLORIDA

NOTE 9 - BONDS PAYABLE

A. Bonds Payable

Bonds payable at June 30, 1999, are as follows (in thousands):

Bond Type	Amount Outstanding	Interest Rates	Annual Maturity To
GENERAL LONG-TERM DEBT ACCOUNT GROUP:			
Road and Bridge Bonds	\$ 1,297,190	4.000-6.875	2028

	<u>12,407,695</u>		
ENTERPRISE FUNDS:			
Toll Facilities Bonds	1,824,096	3.500-10.000	2028
Less, Payable from Restricted Assets (Note 10)	<u>37,240</u>		
	<u>1,786,856</u>		
INTERNAL SERVICE FUND:			
Florida Facilities Pool Bonds	<u>366,321</u>	3.000-7.100	2028
STATE UNIVERSITY SYSTEM:			
State University System Bonds	<u>467,462</u>	3.000-7.000	2028
TOTAL BONDS PAYABLE	<u>\$ 15,028,334</u>		

Road and Bridge (serial and term) *Bonds* are secured by a pledge of a portion of the State-assessed motor fuel tax revenues, discretionary sales tax levied by the City of Jacksonville, and by a pledge of the full faith and credit of the State.

State Board of Education (SBE) Capital Outlay Bonds are issued to finance capital outlay projects of school districts and community colleges. The bonds mature serially and are secured by a pledge of a portion of the State-assessed motor vehicle license tax and by a pledge of the full faith and credit of the State.

Inland Protection Bonds are issued by the Inland Protection Financing Corporation (a blended component unit) to finance the payment and settlement of reimbursement obligations of the Department of Environmental Protection for the cleanup of contamination from leaking petroleum storage tanks. The bonds mature serially and are secured by a pledge of revenues under a service contract with the Department of Environmental Protection.

Lottery Education Bonds are issued to finance all or a portion of the costs of various local school district educational facilities. The bonds mature serially and are secured by a pledge of a portion of the lottery revenues transferred to the Educational Enhancement Trust Fund.

Public Education Bonds are issued to finance capital outlay projects of local school districts, community colleges, vocational technical schools and the State University System. The bonds, serial and term, are secured by a pledge of the State's gross receipts tax revenues and by a pledge of the full faith and credit of the State.

Conservation and Recreation Lands Bonds are issued to acquire lands, water areas, and related resources. The bonds mature serially and are primarily secured by a pledge of the documentary stamp tax.

STATE OF FLORIDA

Save Our Coast Bonds are used to finance the purchase of environmentally significant coastal property. The bonds mature serially and are secured by a pledge of State Land Acquisition Trust Fund collections (primarily documentary stamp taxes).

Preservation 2000 Bonds are issued to pay the cost of acquiring lands and related resources in furtherance of outdoor recreation and natural resources conservation. The bonds mature serially and are secured by a pledge of a portion of the documentary stamp tax.

Investment Restoration Bonds are issued by the Investment Fraud Restoration Financing Corporation (a blended component unit) to finance the simultaneous payment of approved claims made pursuant to Section 517.1203, F.S., by persons who suffered monetary losses as a result of fraudulent securities activities committed by GIC Government Securities, Inc. The bonds mature serially and are secured by a pledge of revenues under a Funding Agreement with the Department of Banking and Finance.

Pollution Control Bonds are issued to make funds available for local government acquisition and construction of pollution control facilities. The bonds are to be serviced by revenues pledged by the local governments and the full faith and credit of the State is pledged as additional security. The bonds mature serially. This amount includes \$45,375,000 that has been escrowed by local governments.

Toll Facilities Bonds are issued to provide construction funds for roads and bridges. The bonds are secured by a pledge of toll facility revenues and a portion of the State-assessed gasoline taxes. In addition, the full faith and credit of the State is pledged to service \$161,655,000 of the bonds outstanding. The bonds outstanding at June 30, 1999, consist of \$1,129,920,000 of serial bonds and \$744,170,000 of term bonds. The amount reported is net of \$33,827,072 unamortized discount and \$16,166,800 unamortized amount deferred on refunding.

Florida Facilities Pool Bonds are issued to provide funds for the acquisition and construction of facilities to be leased to State agencies. The bonds, serial and term, are secured by a pledge of the revenues, derived from the leasing and operations of these facilities. The amount reported is net of \$4,000,471 unamortized discount and \$5,253,754 of unamortized amount deferred on refunding.

State University System Bonds and revenue certificates are issued to construct university facilities, including parking garages and student housing. Bonds and revenue certificates outstanding, which include both term and serial bonds, are secured by a pledge of rental revenues, traffic and parking revenues, and student fee assessments. The amount reported is net of \$4,769,441 unamortized discount.

B. Advance Refundings and Defeased

During the fiscal year ended June 30, 1999, the State of Florida took advantage of favorable conditions and issued bonds for the purpose of advance refunding previously issued bonds. The advance refunding of these bond series was made in order to obtain lower interest rates and the resulting savings in debt service payments over the life of the bond. The economic gains obtained by these advance refundings are the differences between the present value of old debt service requirements and the new debt service.

The proceeds of the refundings, and in some cases additional funds, were deposited into irrevocable trusts and invested in direct obligations of the Federal government and/or obligations guaranteed by the Federal government. The funds deposited along with the interest to be earned will be sufficient to meet the future principal and interest payments on the refunded bonds as they come due.

Bonds defeased through the consummation of refunding transactions are not included in Florida's outstanding debt. Irrevocable escrow accounts held by the State Board of Administration to service the refunded bonds are reported as agency funds. The following advance refundings occurred during the fiscal year:

General Long-Term Debt Account Group:

The State of Florida, Full Faith and Credit, State Board of Education, Public Education Capital Outlay Refunding Bonds, 1998 Series B in the amount of \$224,595,000 were used to advance refund \$41,950,000 of the outstanding bonds of the originally issued \$100,000,00 State of Florida, Full Faith and Credit, State Board of Education, Public Education Bonds, Series A-1; \$31,375,000 of the outstanding bonds of the originally issued \$75,000,000 State of Florida, Full Faith and Credit, State Board of Education, Public Education Bonds, Series A-2; \$34,240,000 of the outstanding bonds of the originally issued \$75,000,000 State of Florida, Full Faith and Credit, State Board of Education, Public Education Bonds, Series B-1; \$28,750,000 of the outstanding bonds of the originally issued \$70,000,000 State of Florida, Full Faith and

STATE OF FLORIDA

Credit, State Board of Education, Public Education Bonds, Series B-2; and \$85,460,000 of the outstanding bonds of the originally issued \$323,485,000 State of Florida, Full Faith and Credit, State Board of Education, Public Education Capital Outlay Bonds, Series 1987-A. This refunding resulted in a debt service savings of \$22,394,420 and an economic gain of \$17,321,817.

The State of Florida, Full Faith and Credit, State Board of Education, Public Education Capital Outlay Refunding Bonds, 1998 Series C in the amount of \$220,370,000 were used to advance refund \$205,400,000 of the outstanding bonds of the originally issued \$250,000,000 State of Florida, Full Faith and Credit, State Board of Education, Public Education Capital Outlay Bonds, 1992 Series B. This refunding resulted in a debt service savings of \$24,613,468 and an economic gain of \$15,333,639.

The State of Florida, Full Faith and Credit, State Board of Education, Public Education Capital Outlay Refunding Bonds, 1998 Series D in the amount of \$226,375,000 were used to advance refund \$206,400,000 of the outstanding bonds of the originally issued \$250,000,000 State of Florida, Full Faith and Credit, State Board of Education, Public Education Capital Outlay Bonds, 1994 Series A. This refunding resulted in a debt service savings of \$22,068,361 and an economic gain of \$12,901,242.

The State of Florida, Full Faith and Credit, State Board of Education, Public Education Capital Outlay Refunding Bonds, 1999 Series A in the amount of \$220,485,000 were used to advance refund \$206,300,000 of the outstanding bonds of the originally issued \$250,000,000 State of Florida, Full Faith and Credit, State Board of Education, Public Education Capital Outlay Bonds, 1992 Series C. This refunding resulted in a debt service savings of \$19,713,290 and an economic gain of \$11,857,270.

The State of Florida, Full Faith and Credit, State Board of Education, Public Education Capital Outlay Refunding Bonds, 1999 Series B in the amount of \$139,525,000 were used to advance refund \$126,590,000 of the outstanding bonds of the originally issued \$155,000,000 State of Florida, Full Faith and Credit, State Board of Education, Public Education Capital Outlay Bonds, 1993 Series F. This refunding resulted in a debt service savings of \$14,937,417 and an economic gain of \$8,885,152.

The State of Florida, Department of Environmental Protection, Save Our Coast Refunding Revenue Bonds, Series 1998A in the amount of \$75,385,000, along with other available funds, were used to advance refund \$18,950,000 of the outstanding bonds of the originally issued \$25,000,000 State of Florida, Department of Natural Resources, Save Our Coast Revenue Bonds, Series H and \$53,915,000 of the outstanding bonds of the originally issued \$92,560,000 State of Florida, Department of Natural Resources, Save Our Coast Refunding Revenue Bonds, Series 1991A. This refunding resulted in a debt service savings of \$7,176,430 and an economic gain of \$5,536,653.

The State of Florida, Full Faith and Credit, Department of Transportation, Right-of-Way Acquisition and Bridge Construction Bonds, Series 1999A in the amount of \$279,315,000, along with other additional funds, were used to advance refund \$121,400,000 of the outstanding bonds of the originally issued \$150,000,000 State of Florida, Full Faith and Credit, Department of Transportation, Right-of-Way Acquisition and Bridge Construction Bonds, Series 1995. This refunding resulted in a debt service savings of \$9,891,124 and an economic gain of \$5,734,484.

Internal Service Fund:

The State of Florida, Department of Management Services, Florida Facilities Pool Revenue Bonds, Series 1999A, in the amount of \$21,175,000 were used, in part, to advance refund \$11,010,000 of the outstanding bonds of the originally issued \$14,180,000 State of Florida, Department of Management Services, Division of Facilities Management, Florida Facilities Pool Revenue Bonds, Series 1994A. This refunding resulted in a debt service savings of \$1,264,886, an economic gain of \$758,810, and a deferred amount on refunding of \$1,124,881.

State University System:

The State of Florida, Board of Regents, University of Florida, Housing Revenue Bonds, Series 1998 in the amount of \$26,155,000, in part, were used to advance refund \$6,645,000 of the outstanding bonds of the originally issued \$7,500,000 State of Florida, Board of Regents, University of Florida Housing Revenue Bonds, Series 1989. This refunding resulted in a debt service savings of \$1,865,205 and an economic gain of \$1,175,740.

STATE OF FLORIDA

The following bond issues were considered to have been defeased during the fiscal year:

General Long-Term Debt Account Group:

State of Florida, Full Faith and Credit, Pollution Control Bonds (Series U)	\$ 3,710,000
State of Florida, Full Faith and Credit, Nassau County Road Bonds	\$ 1,290,000
State of Florida, Full Faith and Credit, Madison County Road Bonds	\$ 630,000

State University System:

State of Florida, University of West Florida Housing System Revenue Bonds 1972	\$ 720,000
--	------------

C. Prior-year Defeased Bonds

In prior years, the State has deposited with escrow agents in irrevocable trusts amounts sufficient to meet the debt service requirements of certain bonds. These defeased bonds are not reported as outstanding debt. Irrevocable trusts established with the State Board of Administration are reported in an agency fund. Debt considered defeased consists of the following (in thousands):

	<u>Principal at 6/30/1999</u>
<i>General Long-Term Debt:</i>	
SBE Higher Education Bonds	\$ 97,770
Pollution Control Bonds	199,465
Public Education Capital Outlay Bonds	1,446,050
Preservation 2000 Bonds	401,300
Road and Bridge Bonds	154,205
<i>Enterprise Funds:</i>	
Toll Facilities Bonds	595,665
<i>Internal Service Funds:</i>	
Florida Facilities Pool Bonds	38,425
State University System Bonds	45,459

D. Annual Requirements for Debt Service

The annual requirements to amortize bonds and certificates of participation payable at June 30, 1999, are as follows (in thousands):

Fiscal Year Ending 6/30	General Long-Term Debt	Enterprise Funds	Internal Service Funds	State University System	Component Units	Certificates of Participation
2000	\$ 1,075,459	\$ 140,259	\$ 27,628	\$ 38,159	\$ 313,185	\$ 3,833

STATE OF FLORIDA

NOTE 10 - RESTRICTED ASSETS AND LIABILITIES PAYABLE FROM RESTRICTED ASSETS

Mandatory asset segregation required by bond indentures is presented in various enterprise funds as restricted assets. Restricted assets are composed of cash and investments in those funds with outstanding bonds. Current bonds payable in these funds are classified as payable from restricted assets. The amounts are as follows (in thousands):

RESTRICTED ASSETS:

Cash	\$ 18
Pooled investments with the State Treasury	352,899
Investments	<u>58,991</u>
Total	<u><u>\$ 411,908</u></u>

LIABILITIES PAYABLE FROM RESTRICTED ASSETS:

Current bonds payable	<u><u>\$ 37,240</u></u>
-----------------------	-------------------------

NOTE 11 - INSTALLMENT-PURCHASE CONTRACTS AND CAPITAL LEASES PAYABLE

Florida has a number of installment-purchase contracts and capital leases providing for the acquisition of machinery, equipment, and buildings. The following is a schedule of future minimum payments remaining under the contracts at June 30, 1999 (in thousands):

Fiscal Year Ended 6/30	General Long-Term Debt	Proprietary Fund Types	State University System	Component Units	Total
2000	\$ 13,177	\$ 10,768	\$ 2,349	\$ 10,267	\$ 36,561
2001	12,755	10,404	1,962	8,518	33,639
2002	8,965	10,248	1,612	7,219	28,044
2003	7,623	9,651	1,339	5,039	23,652
2004	6,936	8,252	915	2,802	18,905
Later Years	63,576	98,216	13,790	36,846	212,428
Total minimum payments	113,032	147,539	21,967	70,691	353,229
Less interest	35,412	47,801	8,762	18,380	110,355
Present value of payments	<u>\$ 77,620</u>	<u>\$ 99,738</u>	<u>\$ 13,205</u>	<u>\$ 52,311</u>	<u>\$ 242,874</u>

Other long-term liabilities:					
Petroleum Clean-Up liability	5,759	5,759
Self-insurance claims	585,485	70,304	98,637	557,152
Other	975	475	88	1,362
Total Primary Government	\$ 11,966,050	\$ 583,284	\$ 2,849,671	\$ 1,666,606	\$ 13,732,399
COMPONENT UNITS					
Bonds payable	\$ 1,930,562	\$ 2,669	\$ 2,669,052	\$ 80,669	\$ 4,521,614
Compensated absences	145,003	(284)	6,136	7,802	143,053
Other	202,387	(29,933)	280,606	39,591	413,469
Total Component Units	\$ 2,277,952	\$ (27,548)	\$ 2,955,794	\$ 128,062	\$ 5,078,136

NOTE 13 - OPERATING LEASES

Florida has long-term commitments for assets leased under operating leases. These assets are not recorded on the combined balance sheet and operating lease payments are recorded as expenditures or expenses of the related funds when paid or incurred. Future minimum lease commitments for noncancelable operating leases as of June 30, 1999, are as follows (in thousands):

Fiscal Year Ending 6/30	Primary Government Operating Lease Commitments	Component Units Operating Lease Commitments	Entity Total
2000	\$ 155,782	\$ 14,388	\$ 170,170
2001	137,501	12,191	149,692
2002	115,434	10,344	125,778
2003	90,419	6,521	96,940
2004	80,367	4,036	84,403
Later Years	190,469	39,723	230,192
Total	\$ 769,972	\$ 87,203	\$ 857,175

Total primary government operating lease commitments consisted of \$11,028,921 for machinery and equipment and \$758,943,466 for land and buildings. Total operating lease commitments for component units consisted of \$4,081,084 for machinery and equipment and \$83,121,559 for land and buildings.

STATE OF FLORIDA

NOTE 14 - INTERFUND RECEIVABLES AND PAYABLES

During the course of operations, there are numerous transactions between funds. At June 30, 1999, amounts to be received or paid with current available resources are reported as due from or due to other funds, whereas the noncurrent portion is reported as advances to or advances from other funds. Receivable and payable balances of various State agencies at June 30, 1999, are as follows (in thousands):

	Interfund Receivables		Interfund Payables	
	Due From Other Funds	Advances To Other Funds	Due To Other Funds	Advances From Other Funds

STATE OF FLORIDA

NOTE 15 - RISK MANAGEMENT

A. Property Self-Insurance Fund

The State Property Insurance Trust Fund, an internal service fund, insures State buildings and contents against loss from fire, lightning, sinkholes, flood, and other hazards customarily insured by extended coverage and loss from the removal of personal property from such properties when endangered by covered perils. The Fund provides coverage up to \$2 million per loss occurrence subject to an annual aggregate of \$5 million, except for losses due to flood. Commercial insurance for losses in excess of coverage provided by the Fund is purchased up to \$200 million per loss event, except losses due to flood. The Fund self-insures up to \$250,000 coverage per State-owned single family residence and \$500,000 coverage per State-owned building for loss or damage due to flood and up to \$100,000 and \$500,000, respectively, for contents thereof.

The Fund's estimated liability for unpaid claims at fiscal year-end is determined by management analyses. Changes in the Fund's claims liability amount for the fiscal years ended June 30, 1998, and June 30, 1999, were as follows (in thousands):

Fiscal Year Ended	Beginning-of-Fiscal-Year Liability	Current-Year Claims and Changes in Estimate	Claim Payments	Other	Balance at Fiscal Year-End
June 30, 1998	\$ 3,760	\$ (691)	\$ (898)	\$	\$ 2,171
June 30, 1999	2,171	1,865	(558)	3,478

B. Casualty Self-Insurance Fund

The Florida Casualty Insurance Risk Management Trust Fund provides insurance for the risks of loss related to Federal civil rights actions, workers' compensation, court awarded attorney fees, automobile liability, and general liability. It is the policy of the State to retain these risks of losses rather than purchasing commercial insurance.

Prior to fiscal year 1998-99, the Florida Casualty Insurance Risk Management Trust Fund was reported as an internal service fund. However, in reviewing the funding decisions and the method for paying claims for this activity, it was decided that the operations of the fund would be more accurately represented as a general fund activity. Accordingly, beginning July 1, 1998, the long-term portion of the claims liability was transferred to the general long-term debt account group through a prior period adjustment (see Note 16); fixed assets were transferred to the general fixed assets account group; the long-term portion of the compensated absences liability was transferred to the general long-term debt account group; and the remaining residual equity was transferred to the general fund.

The estimated liability for unpaid claims at June 30, 1999, was \$557 million. This amount was determined through an actuarial method based on historical paid and incurred losses and includes an amount for losses incurred but not yet reported. In addition, this amount includes the present value of workers' compensation indemnity reserves discounted using a four percent annual percentage rate.

Changes in the Fund's claims liability amount for fiscal years ended June 30, 1998, and June 30, 1999, were as follows (in thousands):

Fiscal Year Ended	Beginning-of-Fiscal-Year Liability	Current-Year Claims and Changes in Estimate	Claim Payments	Other	Balance at Fiscal Year-End
June 30, 1998	\$ 549,990	\$ 114,287	\$ (78,792)	\$	\$ 585,485
June 30, 1999	585,485	70,304	(98,637)	557,152

STATE OF FLORIDA

C. Medical Professional Liability Self-Insurance Program

The Medical Professional Liability Self-Insurance Program provides dental, medical, and veterinary medical professional liability, comprehensive general liability, hospital professional liability, and patient's property liability covering faculty, staff, and students engaged in dental, medical, and veterinary medical programs at the University of Florida, J. Hillis Miller Health Center (JHMHC), the JHMHC at Jacksonville, and the University of South Florida. The funds are reported with the State University System current funds.

The Program's retained risks range from payments on tort claims limited to \$100,000 per claim and \$200,000 per occurrence to \$2 million per occurrence for professional liability up to an aggregate of \$6.5 million for all payments made on claims arising during the fiscal year for the University of Florida JHMHC, up to \$3 million for the University of South Florida, and up to \$6.5 million for the JHMHC at Jacksonville. Losses in excess of these individual and aggregate amounts, up to \$50 million, are insured commercially. Settled claims have not exceeded this commercial coverage in any of the past three fiscal years.

The Medical Professional Liability Self-Insurance Program's estimated liability for unpaid claims at fiscal year-end is the result of both management and actuarial analyses and includes an amount for claims that have been incurred but not reported. The Program purchases annuity contracts from commercial insurers to satisfy certain liabilities; accordingly, no liability is reported for those claims. At June 30, 1999, none of those covered liabilities were still outstanding. Changes in the Program's claim liability amount for the fiscal years ended June 30, 1998, and June 30, 1999, were as follows (in thousands):

Fiscal Year Ended	Beginning-of-Fiscal-Year Liability	Current-Year Claims and Changes in Estimate	Claim Payments	Other	Balance at Fiscal Year-End
June 30, 1998	\$ 34,254	\$ 10,465	\$ (6,010)	\$	\$ 38,709
June 30, 1999	38,709	6,301	(7,558)	37,452

D. Employees Health Insurance Fund

Employees may obtain health care services through participation in the State's group health insurance plan or through membership in a health maintenance organization plan under contract with the State. The State's risk financing activities associated with State group health insurance, such as the risks of loss related to medical and prescription drug claims, are administered through the State Employees Group Health Insurance Trust Fund, an internal service fund. It is the practice of the State not to purchase commercial coverage for the risks of losses covered by this Fund.

The Fund's estimated fiscal year-end liability includes an amount for claims that have been incurred but not reported, which is based on analyses of historical data performed by both the State and its contractors. Changes in claim liability amounts for the fiscal years ended June 30, 1998, and June 30, 1999, were as follows (in thousands):

Fiscal Year-Ended	Beginning-of-Fiscal-Year Liability	Current-Year Claims and Changes in Estimate	Claim Payments	Other	Balance at Fiscal Year-End
June 30, 1998	\$ 68,500	\$ 363,324	\$ (383,023)	\$	\$ 48,801
June 30, 1999	48,801	349,696	(357,511)	40,986

STATE OF FLORIDA

NOTE 16 - PRIOR PERIOD ADJUSTMENTS

Fund balances and retained earnings at July 1, 1998, have been increased/(decreased) as follows (in thousands):

SPECIAL REVENUE FUNDS

To correct the amount of escrow held by the Department of Insurance for the Department of Transportation.

Department of Transportation \$ (13,781)

To reclassify revenue collected but not earned in the prior year as deferred revenue.

Department of Management Services \$ (5,197)

INTERNAL SERVICE FUNDS

To record prior financial activity in the Correctional Privatization Commission Fund.

Department of Management Services \$ (2,602)

To reclassify revenue collected but not earned in the prior year as deferred revenue.

Department of Management Services \$ (52,298)

To record the transfer of the long-term portion of the claims liability from the Casualty Risk Management Insurance Trust Fund to the general long-term debt account group.

Department of Insurance \$ 585,485

FIDUCIARY FUNDS - EXPENDABLE TRUST

To reclassify liabilities to fund balance to identify net assets for plan participants.

Department of Insurance \$ 1,065,849

To record the change in liabilities at June 30, 1998, based on actuarial valuation in the Special Disabilities Trust Fund.

Department of Labor and Employment Security \$ 191,938

To restate the amounts of claims payable and deferred revenue in the Student Loan Guaranty Reserve Fund.

Department of Education \$ 5,282

STATE UNIVERSITY SYSTEM

Loan Fund:

To record the transfer of prior year balances relating to the Stafford Loan Program to the Agency Fund.

Florida International University \$ (1,724)

COMPONENT UNITS

Governmental Fund Types

To remove the Florida Community College Risk Management Consortium as a component unit of the State.

Florida Community College Risk Management Consortium \$ (19,765)

To restate net assets to properly reflect agency transactions between the Florida Prepaid College Foundation and its donors.

Florida Prepaid College Foundation \$ (3,207)

To record the cumulative effect of the implementation of GASB Statement No. 31, SFAS 117, the correction of errors, and the change in the reporting year.

State University System Direct Support Organizations \$ 6,328

To record the cumulative effect of the implementation of GASB Statement No. 31 and the correction of errors.

Other Component Units \$ (65)

To primarily correct classification and accounting errors and implementation of GASB Statement No. 31.

Community Colleges \$ (1,519)

Proprietary Fund Types

To record the cumulative effect of the implementation of GASB Statement No. 31.

South Florida Water Management District \$ (2)

To record the cumulative effect of converting statutory reporting to GAAP.

Florida Comprehensive Health Association \$ (61)

STATE OF FLORIDA

NOTE 17 - GUARANTEES OF INDEBTEDNESS OF OTHERS

The Florida Department of Education (FDOE) administers the Federal Family Education Loans (FFEL) Program, under which the FDOE guarantees loans made to eligible students and their parents by financial institutions. At June 30, 1999, approximately \$3.4 billion of loans were outstanding under this Program. The United States Department of Education (USDOE) participates in the Program as a reinsurer and reimburses the FDOE for defaulted loans at various rates based on the incidence of default. For loans made prior to October 1, 1993, the reimbursement rate for defaulted loans can be 80, 90, or 100 percent. For loans made on or after October 1, 1993, the reimbursement rate for defaulted loans can be 78, 88, or 98 percent. During the 1998-99 fiscal year, the actual rates were 98 and 100 percent. A potential liability exists for loans defaulted in excess of the Federal reimbursement. The specific amount of this potential liability is indeterminable.

Title 20, Part 1072, United States Code (USC), required the FDOE to transfer all liquid and nonliquid assets of the fund used by guaranty agencies to administer the FFEL Program into a Federal Student Loan Reserve Fund (referred to as the "Federal Fund"). Additional restrictions on the use of the assets were imposed by the Federal legislation and USDOE regulations. Because of these restrictions, the fund used by the FDOE to administer the FFEL Program was reclassified as an expendable trust fund.

Title 20, Section 1072(h)(1), USC requires the USDOE Secretary to recall \$1 billion from the reserve funds held by guaranty agencies on September 1, 2002. For purposes of funding this recall, the USC establishes a method for determining each guaranty agency's "required share" of recalled reserve funds. In addition, the USC states that within 90 days after the beginning of each of the fiscal years 1998 through 2002, each guaranty agency shall transfer a portion of the agency's required share to a restricted account established by the agency that is of a type selected by the agency with the approval of the Secretary. The FDOE is required to and has for the 1998-99 fiscal year transferred \$9,809,184 (second of five equal installments) to a designated account. This amount is included in Other Reserves of Fund Balance in the Expendable Trust Fund.

NOTE 18 - SEGMENT INFORMATION FOR ENTERPRISE FUNDS

Segment information for the enterprise funds for the fiscal year ended June 30, 1999, is as follows (in thousands):

	Department of Lottery	Department of Transportation	Other	Total
Operating revenue	\$ 2,104,001	\$ 350,045	\$ 40,272	\$ 2,494,318
Depreciation	2,479	6,255	249	8,983
Operating income (loss)	797,738	204,296	10,804	1,012,838
Transfers in	28	293,144	340	293,512
Transfers out	808,005	222,023	27,687	1,057,715

Current capital contributions	1,738	1,738
Residual equity transfers	35,200	(1,010)	34,190
Property plant and equipment:				
Additions	1,108	418,330	342	419,780
Deletions	4,525	2,902	31	7,458
Net working capital	3,139	199,699	6,519	209,357
Total assets	3,407,007	4,398,504	9,028	7,814,539
Long-term debt	2,017,792	2,015,526	19	4,033,337
Total equity	145,654	2,288,098	7,342	2,441,094

1. The Department of Lottery accounts for the operation of Florida's lottery.
2. The Department of Transportation accounts for the construction, operations, and maintenance of toll and turnpike facilities. Transfers include \$10,407,164 of gas tax collected by the Department of Revenue.
3. Other includes the Departments of Children and Families, Corrections, Juvenile Justice, Labor and Employment Security, Health, Military Affairs, and State.

STATE OF FLORIDA

NOTE 19 – FLORIDA PREPAID COLLEGE PROGRAM

The Florida Prepaid College Program was created in 1987 by Section 240.551, F.S., to provide a medium through which the costs of registration and dormitory residence may be paid in advance of enrollment in a State postsecondary institution at a rate lower than the projected corresponding cost at the time of actual enrollment. The Program is administered by the Florida Prepaid College Board and the State of Florida guarantees to meet the obligations of the Board to qualified beneficiaries if moneys in the Program are insufficient. The Program is accounted for in an expendable trust fund. An actuarial study is performed to determine the Program's funding status. Additional information as of June 30, 1999, is as follows:

Actuarial present value of future benefits payable	\$2,280,926,626
Net assets available (Fair Value)	\$2,685,983,468
Net assets as a percentage of tuition and housing benefits obligation	118 percent

NOTE 20 - FLORIDA HURRICANE CATASTROPHE FUND

The Florida Hurricane Catastrophe Fund (FHCF) was created in 1993 by Section 215.555, F.S., as a State trust fund to provide a stable and ongoing source of reimbursement to qualified insurers for a portion of their catastrophic hurricane losses; thereby creating additional insurance capacity to ensure that covered structures (and their contents) damaged or destroyed in a hurricane may be repaired or reconstructed as soon as possible. The Fund is administered by the State Board of Administration which contracts with each insurer writing covered policies in the State to reimburse the insurer for a percentage of losses incurred from covered events from reimbursement premiums collected. However, payments made to insurers shall not exceed the moneys in the Fund, together with the maximum amount of revenue bonds that may be issued by a county or municipality, or FHCF finance corporation. Beginning June 1, 1999, payments made to insurers shall not exceed the actual claims-paying capacity of the fund up to a limit of \$11 billion for that contract year, unless the board determines that there is sufficient estimated claims-paying capacity to provide \$11 billion of capacity for the current contract year and an additional \$11 billion of capacity for subsequent contract years. Upon such determination being made, the estimated claims-paying capacity for the current contract year shall be determined by adding to the \$11 billion limit one half of the funds estimated claims-paying capacity in excess of \$22 billion. The Fund is accounted for as an expendable trust fund. An actuarially determined formula is used to calculate the reimbursement premium collected. Additional information as of June 30, 1999, follows:

Net assets available to meet future catastrophic losses (Fair Value)	\$ 2,548,719,974
Catastrophic losses incurred during the fiscal year (related to prior years' hurricane seasons)	\$ 158,465

Subsequent to the fiscal year-end, there were no reported residential property losses by qualified insurers within the State of Florida for the 1999 hurricane season ending on November 30, 1999.

NOTE 21 - OTHER LOSS CONTINGENCIES

Florida participates in a number of Federally-assisted grant programs. These programs are subject to audits by the grantors or their representatives. Any disallowance as a result of these audits may become a liability of the State. Any foreseeable disallowances will not have a material adverse effect on the State of Florida's financial position.

STATE OF FLORIDA

NOTE 22 - LITIGATION

Due to its size and broad range of activities, the State is involved in numerous routine legal actions. The departments involved believe that the results of such litigation pending or anticipated will not materially affect the State of Florida's financial position.

A. Barnett Bank v. Florida Department of Revenue

Case No. 97-02375, Duval County Circuit Court, 4th Judicial Circuit. This case involved the issue of whether Florida's refund statute for dealer repossession authorizes the Department to grant a refund to a financial institution as the assignee of numerous security agreements governing the sale of automobiles and other property sold by dealers. The question turned on whether the Legislature intended the statute only to provide a refund or credit to the dealer who actually sold the tangible personal property and collected and remitted the tax or intended that right to be assignable. Judgment was granted in the Plaintiff's favor; however, the First District Court of Appeal overturned the trial court's decision on January 5, 2000, in favor of the Department.

B. Barnett Banks, Inc. v. Florida Department of Revenue

Case No. 98-4104, 1st District Court of Appeal. In this case, the taxpayer challenged the imposition of interest on additional amounts of corporate income tax due as a result of Federal audit adjustments reported to Florida. The Department's historical position was that interest is due from the due date of the return until payment of the additional amount of tax is made. The taxpayer contended that interest should be accrued from the date the Federal audit adjustments were due to be reported to Florida. An Order was issued adopting the position asserted by the Department; however, the taxpayer filed and won on appeal. Potential refunds or lost revenue are estimated to be approximately \$12 to \$20 million per year.

C. Jenkins v. Florida Department of Health and Rehabilitative Services

Case No. 79-102-CIV-J-16, United States District Court, Middle District of Florida. This was a class action suit on behalf of clients of residential placement for the developmentally disabled seeking refunds for services where children were entitled to free education under the Education for Handicapped Act. The Department had been collecting maintenance fees from parents of the placed children and various third parties such as SSI and Social Security. The District Court ruled in favor of the Plaintiffs and ordered repayment of the maintenance fees. Prior to July 1, 1998, the Department repaid the \$217,694 in maintenance fees paid by the parents; however, amounts due to various third parties estimated up to \$42 million have not been paid since the affected parties have not been identified.

D. Nathan M. Hameroff, M.D., et. al. v. Agency for Health Care Administration, et. al.

Case No. 95-5936, Leon County Circuit Court, 2nd Judicial Circuit. This is a class action suit, among other similar suits, wherein the plaintiffs challenge the constitutionality of the Public Medical Assistance Trust Fund (PMATF) annual assessment on net operating revenue of free-standing out-patient facilities offering sophisticated radiology services. The case is now in the discovery process. If the State is unsuccessful in its actions, the potential refund liability for all such suits could total approximately \$116.8 million.

E. Savona, et. al. v. Agency for Health Care Administration

Case No. 96-6323, Leon County Circuit Court, 2nd Judicial Circuit. In this case, Plaintiffs seek retroactive and prospective relief on behalf of a class of Medicaid providers (doctors), demanding reimbursement of differential between Medicare and Medicaid rates for dual-enrolled eligibles. The Agency answered the fourth Amended complaint; the case is at issue. Plaintiffs' motion for summary judgment was heard on December 21, 1999, and is under advisement by the court. If the Plaintiffs prevail, the State's potential liability could be up to \$270 million. This would be the State's share, at 45 percent, within the Medicaid program.

F. Tower Environmental v. Florida Department of Environmental Protection

Case No. 98-01312, Hillsborough County Circuit Court, 13th Judicial Circuit. Tower Environmental has sued the State of Florida and the Florida Department of Environmental Protection (FDEP) alleging that both the State and FDEP "breached" contracts with them by changing the petroleum contamination reimbursement program. Alternatively, Tower claims that these actions constitute torts or impairment of contractual obligations. Tower also

STATE OF FLORIDA

alleges that the termination of the reimbursement program pursuant to Section 376.3071, F.S., is a breach of contract. In addition to damages, Tower seeks recovery of attorneys' fees and costs. There has been a ruling that the statute was a written contract and that the State's sovereign immunity defense was therefore invalid. If attorneys' fees and costs are awarded, the potential liability could amount to approximately \$49 million; however, the parties are currently negotiating a settlement.

G. Peter and Roy Geraci v. Florida Department of Transportation

Case No. 98-3904, Hillsborough County Circuit Court, 13th Judicial Circuit. The Plaintiffs claim that the Florida Department of Transportation has been responsible for construction of roads and attendant drainage facilities in Hillsborough County and, as a result of its construction, has caused the Plaintiffs' property to become subject to flooding, thereby amounting to an uncompensated taking. On December 15, 1998, the Court granted the State's Motion for More Definite Statement as to certain portions of the Plaintiffs' complaint. An amended complaint was filed on March 30, 1999. Trial is scheduled to begin July 3, 2000. If the State is unsuccessful in its actions, potential losses could exceed \$10 million.

H. State Contracting and Engineering Corp. v. Florida Department of Transportation, et. al.

Case No. 97-7014-CIV-Dimitroulea, United States District Court, Southern District of Florida. The Florida Department of Transportation used a Value Engineering Change Proposal (VECP) design submitted by State Contracting and Engineering Corp. (SCEC) for the construction of a barrier soundwall in Broward County and several subsequent Department projects. Subsequent to the initial use of the VECP design, SCEC patented the design. SCEC claims that the Department owes SCEC royalties and compensation for other damages involving the Department's use of the VECP design on the subsequent projects. The case is pending a ruling as to the application of recent U.S. Supreme Court cases to certain legal issues in this lawsuit. If the State is unsuccessful in its actions, potential losses could range from \$30 to \$60 million.

I. Riscorp Insurance Company, et. al. v. Florida Department of Labor and Employment Security and Mary B. Hooks

Case No. 99-5027, Leon County Circuit Court, 2nd Judicial Circuit. Pursuant to Section 440.51, F.S., the Department collects assessments on "net premiums collected" and "net premiums written" from carriers of workers' compensation insurance and by self-insurers in the State. Claimants allege that there is no statutory definition of "net premiums" and the Department does not currently have a rule providing guidance as to how "net premiums" are calculated. Claimants allege that industry standards would allow them to deduct various costs of doing business in calculating "net premiums." The litigation arose from the Department's denial of claims for refunds totaling approximately \$27 million. In addition, at least 20 other carriers have filed similar claims for refund which, in the aggregate, total more than \$39 million. The Department cannot anticipate how many additional claims will be filed. The Department has answered the Complaint and discovery is in progress.

J. U.S. Environmental Protection Agency v. Florida Department of Transportation

This issue constitutes an environmental claim. Title to contaminated land is in dispute. The Department maintains that it is not the owner of the contaminated land. The U.S. Environmental Protection Agency (EPA) is conducting additional tests at the site for pollution and has asserted a cost recovery claim against the Department of approximately \$25.5 million. The Department's Motion for Declaratory Judgment on the Department's ownership of the property was denied and upheld on appeal.

NOTE 23 - DEFICIT FUND EQUITY

Special Revenue Fund – Department of Revenue

The Grants and Donations Trust Fund - Child Support Enforcement has a deficit fund balance of approximately \$8.6 million. This deficit was caused by the unrealized collections of prior year receivables.

Special Revenue Fund – Department of Children and Family Services

The Administrative Trust Fund – Children and Family Programs has a deficit fund balance of approximately \$3.3 million. This deficit is the cumulative result of excess current year expenditures plus recorded accrual expenditures over current year grant revenue.

STATE OF FLORIDA

Internal Service Fund – Department of Insurance

The State Property Insurance Trust Fund has deficit retained earnings of approximately \$3.4 million. This deficit is the cumulative result of claims expense over net assessment of revenue.

Internal Service Fund – Department of Management Services

The Public Facilities Financing Trust Fund has a deficit retained earnings of approximately \$4.5 million. This deficit resulted from the posting of prior years' amortization, depreciation and interest expense in the current year.

Internal Service Fund - Department of Management Services

The State Employees' Group Health Self-Insurance Trust Fund has deficit retained earnings of approximately \$29 million. This results from increased claims expense, including an actuarially estimated liability of approximately \$41 million for claims incurred but not reported for payment by the third-party claims administrator.

Expendable Trust Fund – Department of Transportation

An allocation to record the changes in fair value at June 30, 1999, resulted in a deficit fund balance in the amount of approximately \$30,000.

Expendable Trust Fund - Department of Labor and Employment Security

The Special Disability Trust Fund has a deficit fund balance of approximately \$1.7 billion. This deficit is the cumulative result of claims expense over net assessment revenue.

Component Units - Department of Transportation

The Tampa-Hillsborough County Expressway Authority has deficit retained earnings of approximately \$34 million. This deficit is the result of the change in reporting entity pursuant to Section 348.52, F.S. The Authority assumed infrastructure assets and long-term debt liabilities previously recorded in governmental funds, an agency fund, a general fixed assets account group, and a general long-term debt account group.

STATE OF FLORIDA

NOTE 24 - RESERVES OF FUND BALANCE

The amounts reported in the combined balance sheet identified as reserved fund balance as of June 30, 1999, are comprised of the following (in thousands):

General Fund:	
Reserved for encumbrances	\$ 150,129
Reserved for inventories	16,668

NOTE 25 - SUBSEQUENT EVENTS

A. State Board of Education, Public Education Capital Outlay Bonds:

Series	Amount	Matures	Interest Rate
1999C	\$200,000,000	June 1, 2000 - June 1, 2029	4.500%-6.500%

B. Department of Management Services, Florida Facilities Pool Revenue Bonds:

Series	Amount	Matures	Interest Rate
1999B	\$30,355,000	September 1, 2001 – September 1, 2028	4.000% to 5.500%

C. Board of Regents, Florida International University Parking Facility Revenue Bonds:

Series	Amount	Matures	Interest Rate
1999	\$7,530,000	July 1, 2001 - July 1, 2019	4.000% to 5.625%

D. Board of Regents, University of Central Florida Housing Revenue Bonds:

Series	Amount	Matures	Interest Rate
1999	\$28,140,000	October 1, 2002 – October 1, 2029	4.250% to 5.750%

E. In October 1999, the Florida Ports Financing Commission issued Series 1999 Revenue Bonds totaling \$153,115,000 (refer to Note 8B). These revenue bonds do not create or constitute a legal obligation or debt of the State. However, pursuant to Florida law, the State is obligated to remit \$10 million annually to a designated trustee for the purpose of repaying the debt on these revenue bonds. Funding for this annual remittance continues to be from motor vehicle registration fees, bringing future total annual remittances to \$25 million.

NOTE 26 - COMPONENT UNITS

Component units, as described in Note 1, are legally separate organizations for which the State is financially accountable, and other organizations for which the nature and significance of their relationship with the State are such that exclusion would cause the State's financial statements to be misleading or incomplete. These legally separate organizations are managed independently, outside the State's budgeting process, and their powers generally are vested in a governing board pursuant to various State statutes.

The State's component units are generally supported by revenues derived from their activities, although the State has provided financial assistance, in some cases of a recurring nature, to certain organizations for operating and other expenses. For example, financial assistance, in the form of State appropriations, was provided to the State's community colleges and assistance is expected to continue in future years. Also, the State has issued full faith and credit bonds on behalf of its community colleges.

The State of Florida has over 130 component units. Major component units for the State consist of over 100 organizations classified in the following five categories: environmental, educational, transportation, community affairs, and community colleges. These five categories contain 97 and 95 percent of the total component unit assets and revenues, respectively. The community colleges are excluded from the condensed presentation because they are presented in a separate column on the combined statements. Substantially all financial data was derived from the latest audited annual financial statements and summarized into the accompanying format. Refer to Note 1 for additional discussion pertaining to discretely presented component unit categories and how to obtain further information on individual component units.

STATE OF FLORIDA
YEAR 2000 COMPLIANCE ISSUES
For the Fiscal Year Ended June 30, 1999

Governmental Accounting Standards Board's (GASB) Technical Bulletin 98-1, *Disclosures about Year 2000 Issues*, as amended by GASB Technical Bulletin 99-1, requires disclosures regarding the State's efforts to address the Year 2000 issue relating to its computer systems and other electronic equipment. As of June 30, 1999, the State was in the process of identifying, remediating, and validating/testing the various mission critical systems to preclude Year 2000 related problems. As of June 30, 1999, the State has no significant commitments outstanding relating to addressing the Year 2000 issue. Further, State management's review indicates that as of January 18, 2000, with regard to information technology resources and other electronic equipment:

- The State has experienced no mission critical systems failures as a result of Year 2000 compliance problems.
- The State has not been notified, nor is the State aware, that any significant vendor or contractor will be unable to provide goods or services to the State as a result of Year 2000 compliance problems.
- There have been no significant disruptions of required services by the State as the result of Year 2000 compliance problems.

Schedule of Employer Contributions
 (in thousands)

Year Ended 6/30	Annual Required Contributions	Percent Contributed
1992	\$ 2,347,671	100%
1993	2,529,042	100%
1994	2,734,628	100%
1995	2,880,128	100%
1996	2,967,448	100%
1997	3,036,978	100%
1998	3,206,516	100%
1999	3,096,290	100%

Notes to Required Supplementary Information

The information presented in the above required supplementary schedules was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest actuarial valuation follows:

Valuation date	July 1, 1999
Actuarial cost method	Entry Age Normal
Amortization method	Level Dollar, Open
Equivalent single amortization period	Not Applicable (3)
Asset valuation method	5-Year Smoothed Method
Actuarial assumptions:	
Investment rate of return	8.00%
Projected salary increases	6.25%
Includes inflation at	3.50%
Cost-of-Living Adjustments	3.00%

- (1) Reflects restatement of 1991 actuarial value of assets.
- (2) Between the July 1, 1997 and July 1, 1999 actuarial valuations, two economic assumptions were changed. The projected salary increases assumption was changed from 7.25% to 6.25% and the inflation assumption was changed from 5.5% to 3.5%. The impact of changes in several demographic assumptions is included in the July 1, 1999 AAL valuation.
- (3) The UAAL surplus for the July 1, 1999 valuation precludes calculation of a meaningful number of years.

Castillo de San Marcos National Monument

Location: St. Augustine, Florida, on Florida's northeast coast

Year constructed: Construction began in 1672

History

On September 8, 1565, Pedro Menendez de Aviles landed on the shore of Matanzas Bay and began the founding of the Presidio of San Agustín. The town was to serve several important functions for the Spanish Empire: defending the primary trade route to Europe, serving as the capitol of the territory, and defending against encroachment into the northern reaches of the Empire. Following a pirate attack in 1668, the Queen Regent Mariana began the construction of a fortress to defend the city and port in 1672. This fort would become the Castillo de San Marcos.

The Castillo de San Marco has a long military history dating back to 1695. It is the oldest masonry fort and the best-preserved example of a Spanish colonial fortification in the continental United States. The fort was constructed with a stone called "coquina", which means "little shells". The coquina was quarried from Anastasia Island across the bay from the Castillo, and ferried across to the construction site. Baking oyster shells in kilns resulted in lime which was then mixed with sand and water to produce mortar. This combination of natural materials still holds the Castillo together today.

The Castillo has served a number of nations, but it has never been taken through military force. During the early to mid 1700's, the British made several attempts to overtake the Castillo, but to no avail. In 1763, the British finally gained possession of Florida through the Treaty of Paris and occupied the Castillo until the end of the American Revolution. During the Revolution, Spain declared war on Britain in hopes to regain Florida. The fighting ended before Spain could attempt to overtake the Castillo. However, Spain did regain St. Augustine in the treaty settlement after the Revolution, and on July 12, 1784, Spanish troops returned to the Castillo. Spain continued its occupation of St. Augustine and the Castillo until July 20, 1821, when Spain ceded Florida to the United States of America. The fort was held by both the Confederates and the Union at various times during the Civil War, and was also used as a prison during the mid to late 1800's.

After serving six flags over a 205-year period, the Castillo was declared a National Monument in 1924 and became part of the National Park system in 1933. The Monument and its surrounding land make up 25 acres in downtown St. Augustine, Florida. The fort is also the oldest, continually occupied European settlement in the continental United States.

STATE OF FLORIDA

Special Revenue Funds

The special revenue funds are maintained to account for the proceeds of special revenue sources that are legally restricted to expenditures for specific purposes.

Department of Environmental Protection

Land Acquisition Trust Fund - This fund's primary purpose is to account for the resources necessary to meet debt service requirements of revenue bonds issued to acquire and protect public lands.

Florida Preservation 2000 Trust Fund - This fund accounts for bond proceeds used to acquire, protect, and preserve public lands that are in imminent danger of development, contain valuable natural resources, or may serve as a habitat for endangered, threatened or rare species.

Inland Protection Trust Fund - This fund serves as a repository for resources which enables the department to respond to incidents of inland contamination related to the storage of petroleum and petroleum products in order to protect the public health, safety, and welfare and to minimize environmental damage.

Department of Education

Educational Enhancement Trust Fund - This fund is established to account for the revenues and expenditures related to moneys transferred from the Department of the Lottery for public educational programs.

Public Education Capital Outlay and Debt Service Trust Fund - Revenues to this fund consist of bond proceeds, interest, and gross receipts tax. Distributions include school districts, community colleges and state universities for capital outlay projects, investments and debt service payments.

Educational Aids Trust Fund - This fund accounts for federal grants to the Division of Public Schools. Disbursements to school districts are for the operation of federal programs.

Food and Nutrition Services Trust Fund - This fund accounts for federal moneys to reimburse school districts participating in federal programs.

Department of Transportation

State Transportation Trust Fund - This fund is maintained to account for the majority of the operations of this department. In addition to federal grants, it is funded by transfers from motor fuel taxes and motor vehicle and mobile home licenses.

Department of Children and Families

Economic Services Direct Assistance Trust Fund - Moneys for this fund come from the Federal Title IV-A TANF program. The fund is used to make TANF payments.

Department of Revenue

This department is the collection agency for most State taxes and maintains trust funds to account for the resources and distribution of these funds.

Fuel Tax Collection Trust Fund - The major distribution of this tax is among the counties, municipalities, and the Department of Transportation.

Intangible Tax Trust Fund - Counties receive 35.3% of this tax after appropriations to the department. The remainder is transferred to the general fund.

Documentary Stamp Tax Trust Fund - The majority of this tax is used for the payment of debt service and land acquisitions.

Local Government ½ Cent Sales Tax Fund - This fund collects and distributes a part of sales tax to eligible local governments.

Agency for Health Care Administration

Medical Care Trust Fund - Revenues of this fund are derived from federal Title XIX grant moneys. The fund is used to make medical assistance payments to Medicaid service providers.

Public Medical Assistance Trust Fund - This fund is established to account for health care services provided to indigent persons.

State Board of Administration

Tobacco Settlement Trust Fund - This fund invests proceeds received by the State as a result of the settlement of its lawsuit against the tobacco industry.

Fort Clinch

Location: Amelia Island, on Florida's northeast coast

Year constructed: Construction began in 1847

History

Fort Clinch was named in honor of General Duncan Lamont Clinch, an important figure in Florida's Seminole War of the 1830s. Construction of the fort, located on Amelia Island, began in 1847 and continued during the Civil War. When the war began, Confederate forces occupied the fort. The following year, federal troops gained control of the fort after General Robert E. Lee ordered the Confederate troops to withdraw. Although the location of Fort Clinch was of strategic importance, it did not play a major role in the Civil War. Studies revealed that neither side engaged the fort's guns in battle.

The fort served two other minor purposes before becoming a state park. First, the Engineer Department of the Army maintained the reservation until early 1898 when the fort was briefly occupied during the Spanish-American War. In addition, the Coast Guard, in a joint effort with the Navy and Army, maintained a surveillance and communications system within the fort to guard against spies or saboteurs.

In 1926, the fort had no military value and was offered for public sale by the federal government. It was purchased by private interest, but later sold to the State of Florida. Fort Clinch State Park, created in 1936, became one of the first parks in the Florida Park System. During the following two years, the Civilian Conservation Corps initiated development of the park. The park's 1,086 acres are comprised of sand dunes, overwash plains, maritime hammock, and estuarine tidal marsh. These areas provide prime locations for camping, hiking, saltwater fishing, shelling, and nature watching.

Fort Zachary Taylor

Location: Key West, Florida

Year constructed: Construction began in 1845

History

Fort Zachary Taylor was one in a system of seacoast forts initiated to prevent hostile invasion. Construction of the fort began in 1845, shortly after Florida acquired statehood and was named after U.S. President Zachary Taylor. The trapezoidal shaped fort was constructed about 1,000 feet offshore. Throughout the 1850s, construction was slow due to the fort's remote location, illness, shortages of materials, and hurricanes. Once the fort was completed in 1866, it was comprised of impressive features such as sanitary facilities flushed by the tide and a desalination plant that produced drinking water.

The fort was utilized in the Civil War and the Spanish-American War. When the Civil War broke out in 1861, Capt. John Brannon occupied the fort, placing it in Union hands. Key West was an important outpost for the Union because numerous blockade-running ships were detained at Key West harbor and guarded by Fort Taylor's cannons. At one time, 299 captured Confederate ships were held in the Key West harbor under the guns of the fort. The 10-inch Rodman and Columbiad cannons at the fort had a range of three miles. This was an impressive deterrent to the Confederate navy, preventing them from attempting to take the fort or the island of Key West. Proving to be a severe loss for the South, Fort Taylor remained in Union hands throughout the Civil War.

In the years that followed, Fort Taylor was again used during the Spanish-American War. In an effort to modernize the fort, the top levels were cut down to install newer weapons in 1889. With the coming of the 20th century, more sophisticated weapons and eventually radar and other devices took the place of guns. By 1947, the Army turned Fort Taylor over to the Navy to maintain. Years of silt build-up in the harbor have made the fort landlocked, creating a pleasant man-made beach for swimming and snorkeling.

The Fort has the largest collection of Civil War armament in the United States. During extensive modifications in 1898, some of the cannons and ammunition buried in the walls were unearthed and are now on display. Fort Taylor was placed on the National Register of Historic Places in 1971 and was designated as a National Historic Landmark in 1973.

Fort De Soto

Location: Mullet Key, Florida, south of St. Petersburg

Year constructed: 1898-1903

History

The recorded history of the island known as Mullet Key began in February 1849 when a group of United States Army Engineers anchored offshore to survey the coastline for possible use as a coastal defense area. Among these individuals was young Brevet Colonel Robert E. Lee. The army engineers recommended Mullet Key for military utilization thereby prohibiting any private use or development. Construction of the fort began in 1898, and work continued until 1903, when the last guns were mounted and test fired. Fort De Soto was built to protect Tampa Bay from naval attack.

Fort De Soto played a minor role during the Civil War. Ironically, the weapons were never fired at an enemy in anger. However, the fort played a significant role in the evolution of modern weaponry. Today, the most notable aspects of the fort are four 12-inch seacoast rifled mortars. The army did not remove the mortars after the fort was deactivated in the 1920s or during World War II when the island was used as a bombing range. Also, the fort possesses two 6-inch Armstrong rapid-fire rifled guns that were originally mounted at Fort Dade. The mortars and guns are the only weapons of their kind remaining in the continental United States.

In 1977, the fort was added to the National Register of Historic Places. Today, the entire island is Fort De Soto Park, which offers fine beaches, fishing, nature trails, camping and boating.

Internal Service Funds

The internal service funds are used to account for the financing of goods or services by one department to other departments of the government on a cost-reimbursement basis.

Department of Children and Families

Working Capital Trust Fund - This fund accounts for the department's data center.

Department of Management Services

State Employees Health Insurance Trust Fund - This fund accounts for both employee and employer contributions to the various health plans available to State employees.

Fort Pickens

Location: Santa Rosa Island, Florida in Florida's Panhandle

Year constructed: 1829-1834

History

Fort Pickens is the largest of four forts built to defend Pensacola Bay and its navy yard. The fort was begun in 1829, completed in 1834, and used until the 1940s. Bernard Simon, a French military engineer, was hired by the United States as a consultant to design the fort. Although the French school of design influenced the fort's construction, the reliance upon harbor defense was uniquely American.

The construction of Fort Pickens was a massive project. Over 21.5 million bricks were required, most made locally and then barged to the island. Supplies came from everywhere: lime from Maine, granite from New York, lead from Illinois, copper from Switzerland, and skilled labor from New Orleans. The intricate construction enabled the fort's occupants to attack enemies from several points within the fort. During most of the Civil War, Fort Pickens was held by the Union soldiers.

As weapons technology improved, old forts were modified and updated to provide better defenses. Fort Pickens was the focal point of the development and implementation of advanced technology after the Civil War. Because rifled artillery and warships called for more elaborate defenses, five reinforced concrete fortifications were built in the Fort Pickens area between 1897 and 1899, and a minefield was prepared for the harbor entrance. The next threat came from the development of smaller and faster ships designed to penetrate minefields. These minesweepers and torpedo boats led to the development of rapid-firing cannons to protect minefields. Three batteries were built between 1898 and 1905 at Fort Pickens for such weapons. Fort Pickens was closed in 1947, after 118 years of service, but can be toured as part of the Gulf Islands National Seashore.

Trust and Agency Funds

The trust and agency funds account for the assets held by the government unit in a trustee capacity and/or as an agent for individuals, private organizations, other government units, and/or other funds. These funds include expendable trust funds, nonexpendable trust fund, pension trust fund, agency funds, and investment trust funds.

EXPENDABLE TRUST FUNDS

State Board of Administration

Florida Hurricane Catastrophe Fund - This fund provides reimbursement to qualified insurers for a portion of their catastrophic hurricane losses.

Florida Prepaid College Trust Fund - This fund provides for the prepayment of postsecondary education expenses for the residents of the State.

Department of Insurance

Deferred Compensation Trust Fund - This fund accounts for the State's employees' deferred compensation investments and corresponding liabilities

Department of Labor and Employment Security

Unemployment Compensation Benefit Trust Fund - This fund accounts for the collection of unemployment compensation contributions and the benefit payments.

Department of Education

Student Loan Guaranty Reserve Trust Fund - This fund is created to administer federal funding related to the Federal Family Education Loan Program.

NONEXPENDABLE TRUST FUND

Department of State

Ringling Museum Investment Trust Fund - This fund accounts for the endowment principal for the John and Mable Ringling Museum of Art.

PENSION TRUST FUND

Division of Retirement

Florida Retirement System Trust Fund - See Note 7 for a complete description of this fund.

AGENCY FUNDS

State Board of Administration

Debt Service Escrow Trust Fund - This fund accounts for the State Board of Administration's activities as an escrow agent related to the administration of defeased debt for the State and its actions as a trustee for the related bondholders.

Department of Banking and Finance

Social Security Contribution Trust Fund - Social security contributions from participating State employees and employer contributions pass through this fund to the Federal Government.

Department of Revenue

Local Option Gas Tax Trust Fund - This fund accounts for the distribution of local option gas tax collections to counties and municipalities.

INVESTMENT TRUST FUNDS

State Board of Administration

Local Government Surplus Funds Trust Fund - These funds allow local governments to maximize their interest earnings on the surplus funds on both a pooled and non-pooled basis.

General Long-Term Debt Account Group

The general long-term debt account group is maintained to account for the unmatured principal of bonds, notes, or other forms of noncurrent or long-term general obligation indebtedness that is not a specific liability of any proprietary fund or trust fund. General long-term debt is not limited to liabilities arising from debt issuance but may also include noncurrent liabilities on lease purchase agreements, compensated absences and other commitments that are not current liabilities properly recorded in governmental funds.

Fort Caroline

Location: On the St. Johns River, near Jacksonville, Florida

Year constructed: 1564

History

On April 22, 1564, Rene de Laudonniere, leader of a French colonization effort, sailed from the French port of Le Havre. Accompanying him were French noblemen, colonists, livestock, and supplies. He landed at the mouth of the St. Johns River where, two years earlier, French explorer Jean Ribaut had placed a marble column claiming the land for France. Overlooking the entrance to the river, the French built a small colony comprised of a village and small fortification. The area was intended to be an experimental outpost where the Huguenots (French Protestants) would be granted religious tolerance. The fort was named “La Caroline” meaning land of Charles, King of France.

The fort was built in a triangular shape. The wall facing the St. Johns River was made of wooden boards and strengthened by large timber stakes. A moat was dug around the other two sides and the dirt from the moat created a nine-foot-high earthen wall.

The Spanish also claimed sovereignty of Florida. In September 1565 Spanish forces marched from their settlement in St. Agustín (St. Augustine), approximately forty miles away, to Fort Caroline to drive the French out. The Spanish captured the village on September 20, 1565, killing 140 defenders and imprisoning 60 women and children. This attack ended France’s effort to colonize the American southeast. La Caroline was never reoccupied.

Nothing remains of the original fort. At Fort Caroline National Memorial there is an exhibit based on the drawings of Jacques Le Moyne, an artist in Laudonniere’s expedition. These drawings capture the history of the French colony and their interactions with the native Timucuans. The Visitor Center at the fort also serves as the center of the Timucuan Ecological and Historic Preserve. It is located within the Golden Crescent, an area running along the Atlantic Coast from Savannah to Cape Canaveral and stretching inland toward Tallahassee. This area is rich in history, having been inhabited by Native Americans for thousands of years.

Fort Barrancas

Location: Pensacola, Florida

Year constructed: 1839-1844

History

Fort Barrancas stands at the entrance to Pensacola Bay. The British built the first fort on this site, the Royal Navy Redoubt, in 1793. The Spanish captured Pensacola from the British in 1871 and constructed their own structure called San Carlos de Barranca. The Spanish word barranca means bluff, which is an excellent description of the location of the fort.

After the War of 1812, the United States decided to build forts at all major harbors. When Florida attained statehood in 1821, Pensacola was selected for a navy yard. To protect that yard four forts were built: Pickens on Santa Rosa Island, McRee on Foster's Bank, and Barrancas and Advanced Redoubt on the mainland. Fort Barrancas was designed to serve two roles: defend the harbor's entrance and prevent troop movement from the mainland into the navy yard. The most unique feature of the fort is found in the interior walls, which are supported by sand filling open-ended arches against curved retaining walls in the galleries. The system uses the natural slope of the sand to relieve pressure on the outer walls.

In 1861, only one company was assigned to the forts at Pensacola. When Civil War threatened, the company moved from Fort Barrancas to Fort Pickens. Meanwhile, Confederate troops occupied Fort Barrancas. The forts exchanged heavy gunfire in November of 1861 and January 1862. Confederates abandoned the Pensacola forts in May of 1862.

New cannons and ironclad ships of the Civil War rendered the masonry forts obsolete. Fort Barrancas was armed with new guns in 1894, but the fort was less useful than the new concrete structures at Fort Pickens and McRee. In the later years, the old fort served as a signal station, a small arms range, and a storage area. Furthermore, new weapons of World War II eliminated the need for coastal artillery in the United States and the fort was turned over to the Navy in 1946. The fort became part of the Gulf Islands National Seashore in 1971. The National Park Service reopened the fort in 1980 following 18 months of intense restoration, costing \$1.2 million and using 60,000 bricks.

Fort Jefferson

FINANCIAL STATEMENTS

Fort Jefferson

Location: Dry Tortugas National Park, a cluster of seven islands approximately 70 miles west of Key West. Spanish Explorer Ponce de Leon named this group of islands Las Tortugas after the sea turtles that still nest on its beaches. The islands were later renamed "Dry Tortugas" because no fresh ground water exists on the islands.

Year constructed: 1846 to 1866

History

In the aftermath of the War of 1812, a set of forts stretching from Maine to Texas was envisioned to provide defense for the young country. Fort Jefferson, named for Thomas Jefferson, was planned as the greatest of these forts. Construction of Fort Jefferson began in 1846 and continued until 1866. Although the fort was never 100 percent complete, it was a remarkable engineering accomplishment: the foundation was laid underwater; the walls are 8 feet thick and 50 feet high; and the building was constructed with 16 million hand-made red bricks. Construction on the fort dragged on for more than 20 years. In addition to the inconsistency of funding provided by Congress, the task was made difficult by the challenges of shipping workers and supplies 70 miles into the Gulf of Mexico.

The fort was originally intended to protect shipping traffic through the Florida Straits. However, the invention of the rifle cannon during the Civil War rendered the walls of the fort vulnerable to destruction and made the fort itself somewhat obsolete. During the Civil War, Fort Jefferson evolved into a Union military prison for captured deserters and other criminals. The most famous prisoner, Dr. Samuel Mudd, was convicted of conspiracy for treating President Abraham Lincoln's assassin, John Wilkes Booth. This famous prisoner helped doctors fight an epidemic of yellow fever in the fort. In 1874 the army completely abandoned the fort after several hurricanes and the yellow fever epidemic. It wasn't until 1898 that the military returned in the form of the Navy, which used the facilities during the Spanish-American War.

As the military value of Fort Jefferson waned, its environmental value increased due to pristine reefs, abundant sea life, and impressive numbers of birds. In 1908 the area became a wildlife refuge to protect the sooty tern rookery from egg collectors. President Franklin D. Roosevelt designated Fort Jefferson as a National Monument in 1935 to protect its natural and historic features. On October 25, 1992, the Monument was upgraded to National Park status in a bill signed by President George Bush.

Other Component Units

Component units are organizations which are legally separate from the State, and for which the State is financially accountable, or whose relationships with the State are such that exclusion would cause the State's financial statements to be misleading or incomplete. These legally separate organizations are managed independently, outside the State's budgeting process, and their powers generally are vested in a governing board pursuant to various State statutes. The following combining statements exclude the State's community colleges, which are shown separately on the combined financial statements.

Due to the large number of the State's component units, the accompanying financial statements present combining financial data for other component units aggregated in two levels as follows: (1) governmental fund types and not-for-profit organizations; proprietary fund types; agency fund types; and account groups; and (2) the State agencies with which they are associated.

Governmental Fund Types and Not-For-Profit Organizations - This category accounts for the acquisition, use, and balances of other component units' expendable financial resources and related current liabilities, except those accounted for in proprietary funds. This group includes water management districts, transportation authorities, and direct support organizations of the State University System.

Proprietary Fund Types - This category accounts for other component units' activities that are similar to those often found in the private sector. This group includes water management districts, transportation authorities, insurance funds, Florida Housing Finance Corporation, and Prison Rehabilitative Industries and Diversified Enterprises, Inc.

Agency Fund Types - This category accounts for the assets held by other component units in a trustee capacity and/or as an agent for other organizations, governmental units, or funds. This group includes water management districts and transportation authorities and primarily consists of their deferred compensation plans.

Account Groups - The account groups provide accountability for and control of other component units' general fixed assets and general long-term debt. This group includes water management districts and transportation authorities.
